3D WEBSOFT INC. FOUNDATION

SCHOOL FUTURE TECH PROGRAMM

Faculty Name :

Course Duration	: 5 Months (150 Days)
Classes	: Offline & Online
Daily Teaching	: 3 Hours
Total Hours	: 300 Hours

3DWEBSOFT FOUNDATION

LEVEL 1 – JUNIOR INNOVATORS (5th–6th Standard)

MODULE 1 – COMPUTER BASICS (Classes 1–20)

Class 10 — Mouse Practice – Click, Double Click, Drag & Drop (Complete Notes)

Complete Theory & Practical Notes

Learning Objectives

By the end of this class, students will be able to:-

- Understand what a computer mouse is.
- Identify the parts of a mouse.
- Learn different mouse actions.
- Practice Click, Double Click, Drag, and Drop.
- Improve mouse control and accuracy.
- Create an interactive Scratch project using mouse events.

What is a Computer Mouse?

3DWEBSOFT FOUNDATION

Definition

A **Mouse** is an **Input Device** used to control the pointer (cursor) on the computer screen.

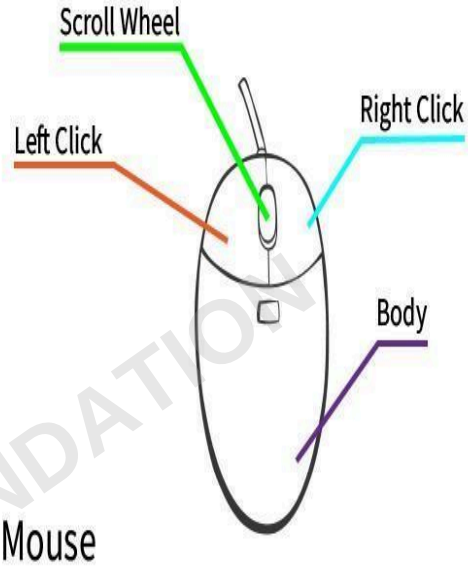

It allows users to:-

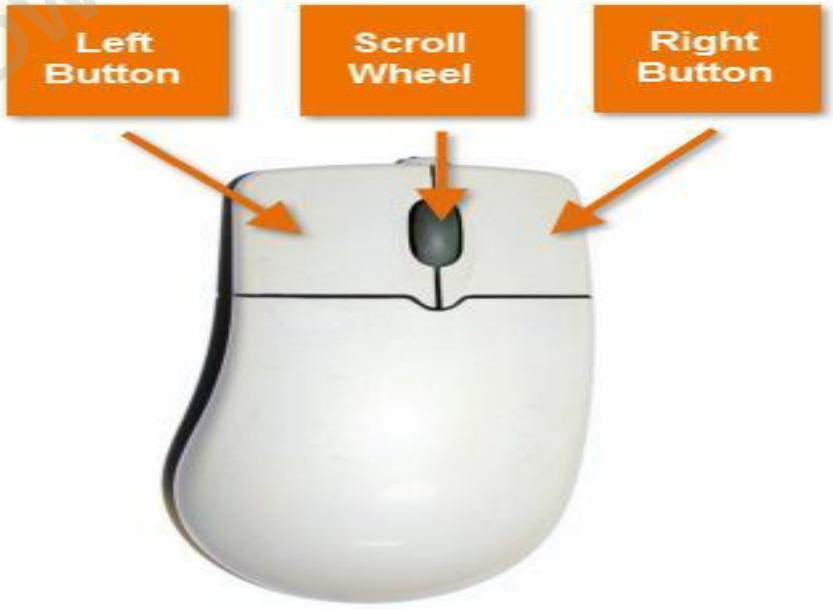

- Select files
- Open applications
- Draw pictures
- Play games
- Move objects

- Browse the Internet

Parts of a Mouse

3DWEBSOFT FOUNDATION

1. Left Button

- Used for clicking and selecting items.
- Used to open files with a double click.

2. Right Button

- Open shortcut menus.

3. Scroll Wheel

- Scrolls up and down web pages and documents.

Mouse Pointer (Cursor)

The **Mouse Pointer** is the small arrow on the screen that moves when you move the mouse.

Uses

- Select icons
- Open files
- Draw pictures
- Click buttons

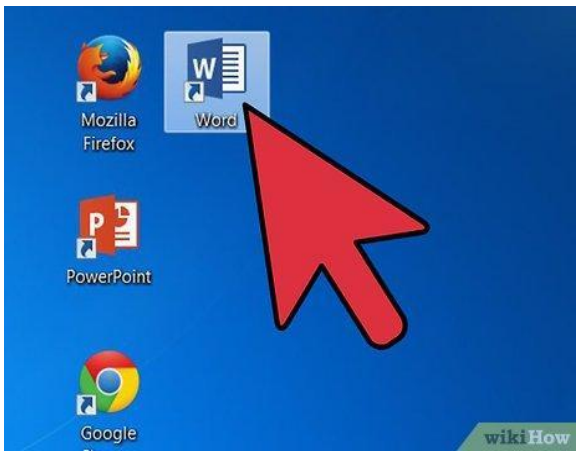

3DWEBSOFT FOUNDATION

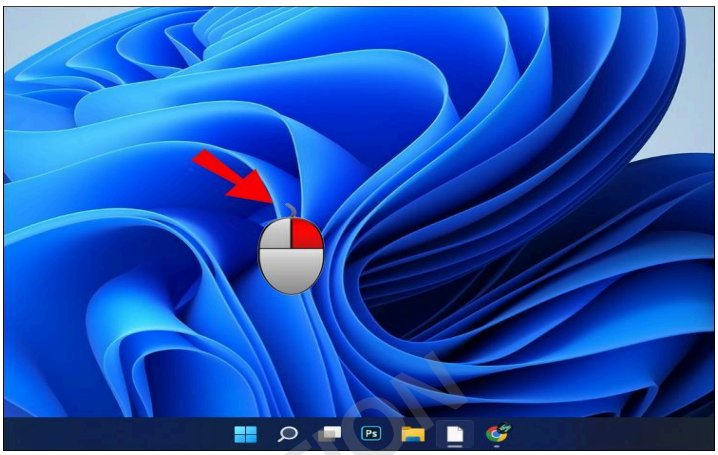

Mouse Actions

Today we will learn four important mouse actions:-

1. Click
2. Double Click
3. Drag
4. Drop

1. Click

3DWEBSOFT FOUNDATION

What is Click?

A **Click** means pressing and releasing the **Left Mouse Button once**.

Uses

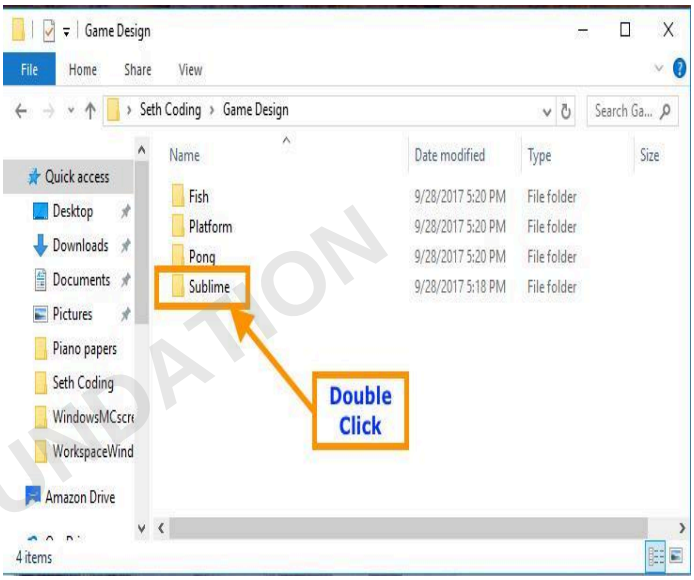

- Select an icon
- Press a button
- Choose a menu
- Place the cursor

Example

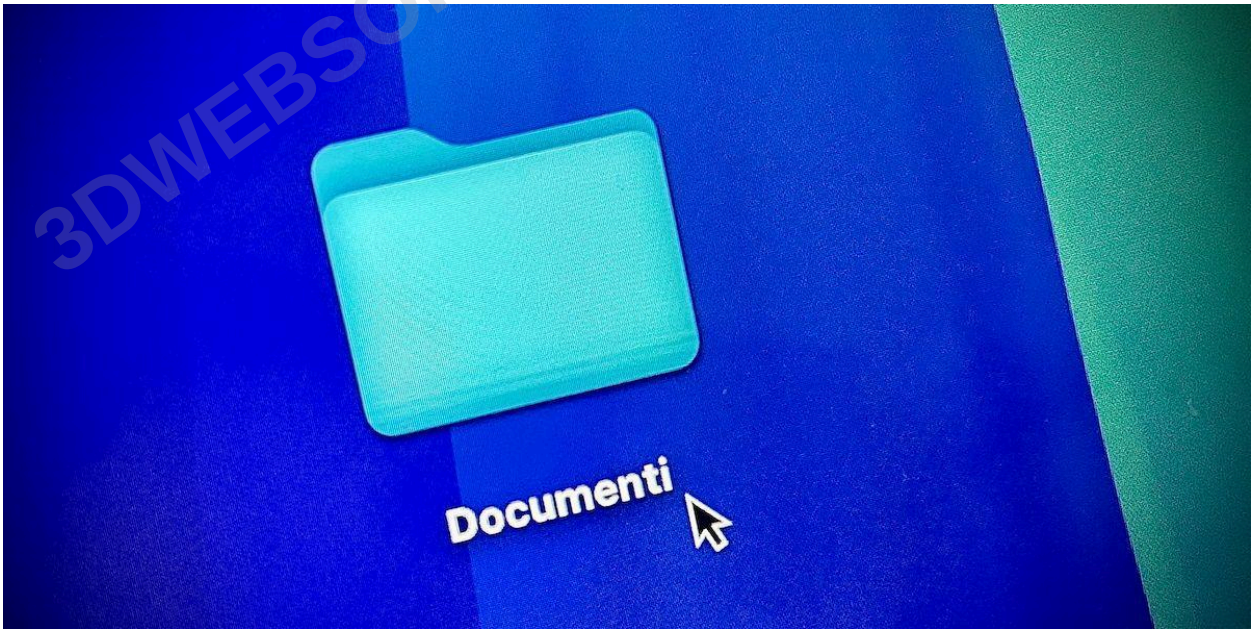

Click the **Paint** icon once to select it.

2. Double Click

3DWEBSOFT FOUNDATION

What is Double Click?

A **Double Click** means pressing the **Left Mouse Button twice quickly**.

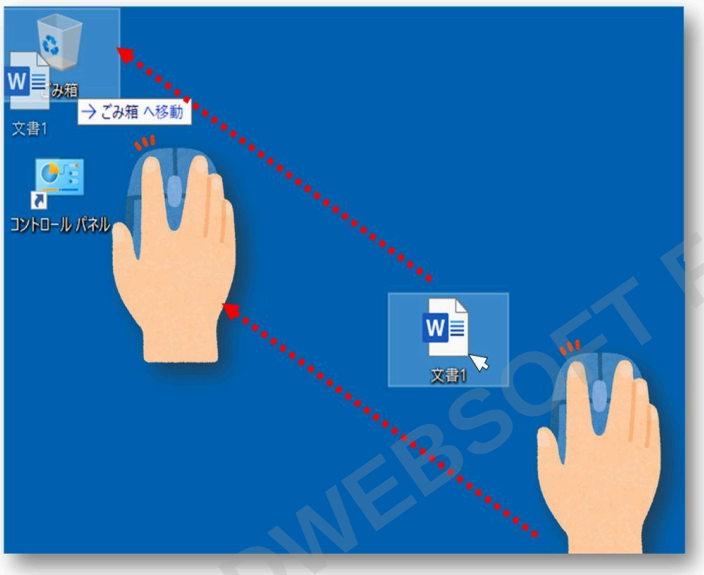

Uses

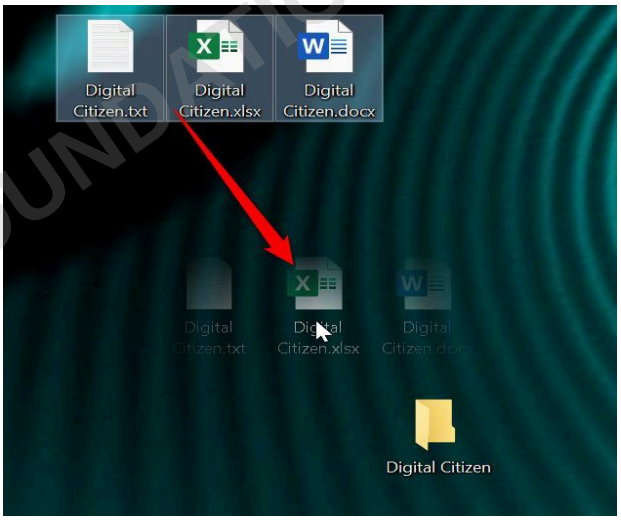

- Open a folder
- Open a file
- Start a program

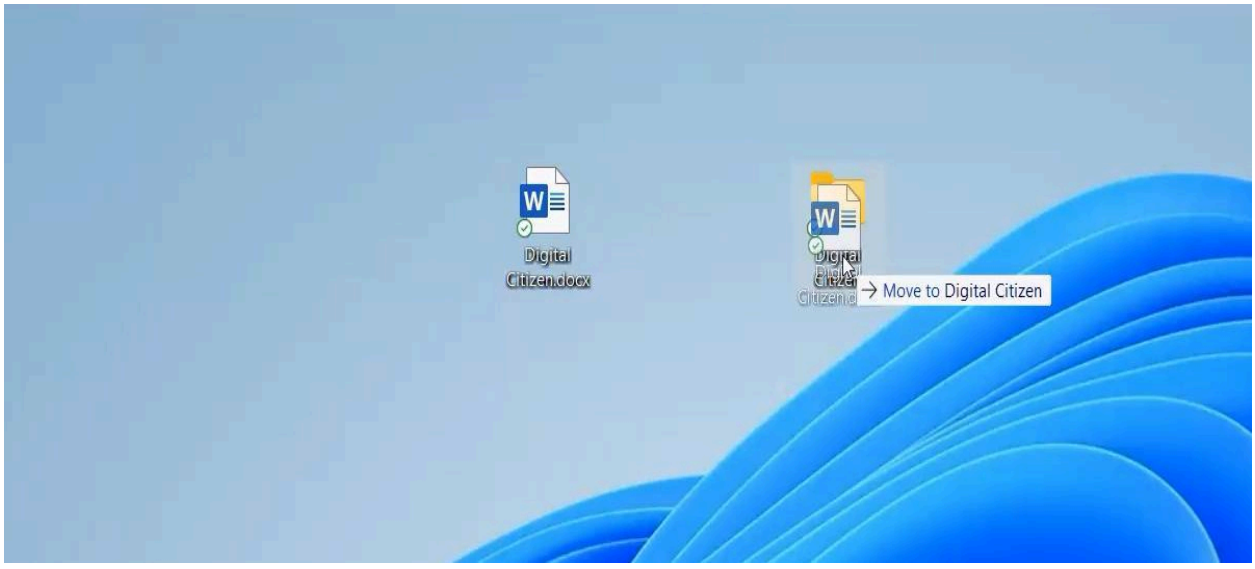

Example

Double-click the **This PC** icon to open it.

3. Drag

3DWEBSOFT FOUNDATION

What is Drag?

Drag means holding down the **Left Mouse Button** while moving the mouse.

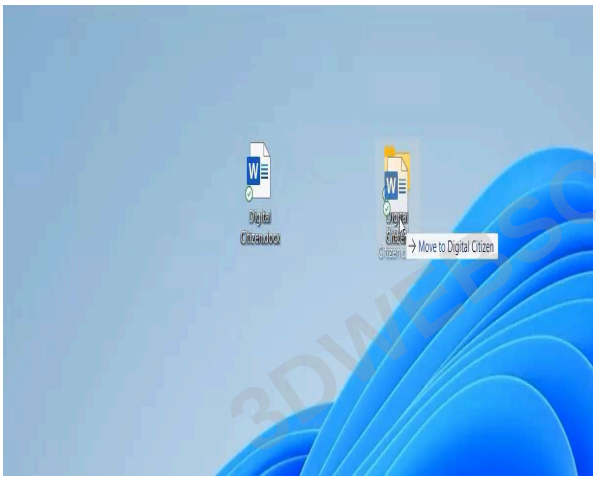

Uses

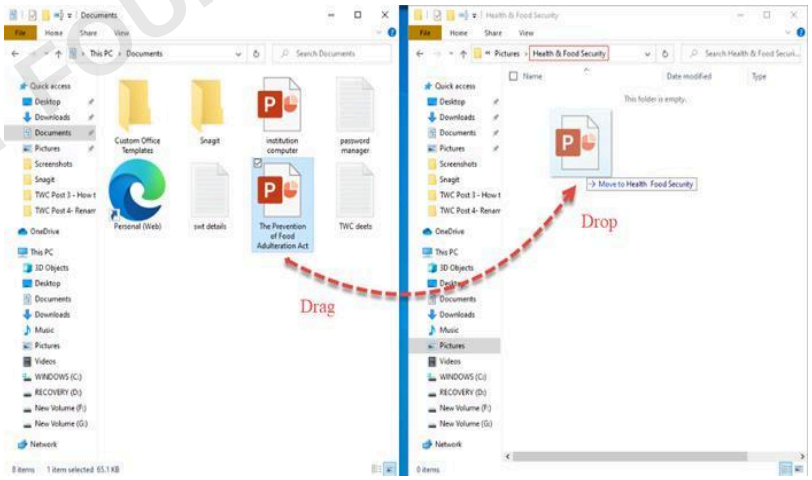

- Move files
- Move icons
- Draw shapes
- Select text

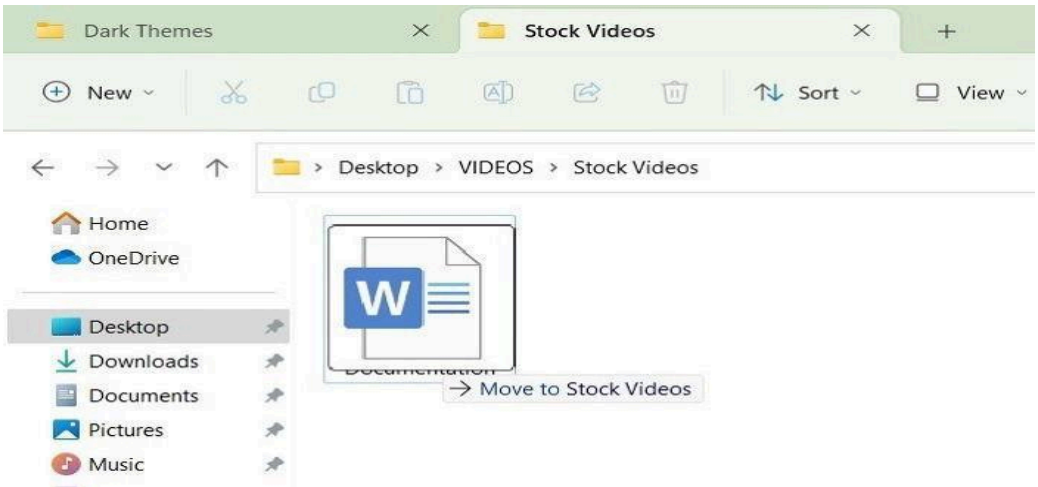

Example

Drag a desktop icon from one place to another.

4. Drop

3DWEBSOFT FOUNDATION

What is Drop?

Drop means releasing the mouse button after dragging an object.

Uses

- Place files into folders
- Arrange desktop icons
- Move pictures

Example

Drag a file into a folder and release the mouse button.

Mouse Actions Summary

Mouse Action	How to Do It	Example Use
Click	Press left button once	Select an icon
Double Click	Press left button twice quickly	Open a folder
Drag	Hold left button and move	Move an icon
Drop	Release the left button	Place an item in a new location

3DWEBSOFT FOUNDATION

Mouse Skills Used in Daily Tasks

Common Mouse Actions

Illustrative frequency of mouse actions in everyday computer use.

Classroom Practical Activity

Activity 1 – Click Practice

Students:

- Click the **Start Button**.

- Click the **Paint** icon.
- Click different desktop icons.

Goal: Learn single-click selection.

Activity 2 – Double Click Practice

Students:

- Double-click **This PC**.
- Double-click a folder.
- Double-click **Paint** to open it.

Goal: Learn how to open applications and folders.

Activity 3 – Drag and Drop Practice

Students:-

- Drag a desktop icon to a new position.
- Drag a shape inside Paint.
- Drag a file into a folder (teacher demonstration if needed).

Goal: Learn how to move objects.

Activity 4 – Paint Drawing Practice

Open Paint and:

- Draw a circle.
- Draw a square.
- Choose a different color.
- Save the picture as **my drawing**.

Learning Outcome: Students use the mouse to draw, select tools, and save a file.

Practical Coding Activity (Scratch)

Project Title

"Mouse Skills Adventure"

3DWEBSOFT FOUNDATION

Objective

Students create a Scratch project where mouse actions make sprites move and respond.

Step 1

Open **Scratch**.

Create a new project.

Delete the default Cat sprite.

Step 2

Add Sprites

- Cat
- Ball
- Star
- Apple

Choose a playground background.

Step 3 – Programming

Green Flag

when green flag clicked
say "Welcome! Use your mouse to interact with the objects." for 3 seconds

Click Event

when this sprite clicked
say "You clicked me!" for 2 seconds

Drag Sprite

Enable dragging for the sprite:-

set drag mode [draggable v]

Students can now drag the sprite around the stage.

3DWEBSOFT FOUNDATION

Mouse Pointer Movement

when green flag clicked
forever
go to [mouse-pointer v]
end

This makes a sprite follow the mouse pointer.

Drag Challenge

Ask students to drag the **Apple** sprite into a **Basket** sprite.

When touching the basket:

if <touching [Basket v]> then
say "Great Job!" for 2 seconds
play sound [Cheer v]
end

3DWEBSOFT FOUNDATION

Advanced Scratch Challenge:-

Create a mini-game called **"Catch the Star"**.

Rules

- The star moves to random places.
- Students click it before time runs out.
- Each successful click increases the score.

Example:-

when this sprite clicked
change [Score v] by 1
go to random position

Add a **30-second timer** and display the final score.

AI Connection

Discuss with students:-

- How do robots know where to move objects?

- Can AI recognize mouse clicks?
- Why are drag-and-drop actions useful in games and educational apps?
- Where have you used drag-and-drop before (folders, photos, Scratch)?

Fun Quiz:-

1. Which mouse action selects an icon?

- ***A) Click***
- B) Drag
- C) Drop

2. Which mouse action opens a folder?

- A) Drag
- ***B) Double Click***
- C) Scroll

3. What does Drag mean?

- A) Press the mouse once
- ***B) Hold the left button and move the mouse***
- C) Turn off the computer

4. What does Drop mean?

- A) Delete a file
- ***B) Release the mouse button after dragging***
- C) Scroll the page

5. Which part of the mouse helps move through long documents?

- A) Left Button
- B) Right Button
- ***C) Scroll Wheel***

Real-Life Practice

Students should practice these tasks on a classroom computer:

SSWEBSOFT FOUNDATION

Task	Mouse Action Used
Select a file	Click
Open Paint	Double Click
Move an icon	Drag
Place an icon in a new position	Drop
Scroll a web page	Scroll Wheel

Homework:-

1. Draw a computer mouse and label its **Left Button**, **Right Button**, and **Scroll Wheel**.
2. Write one use of each mouse action: **Click, Double Click, Drag, and Drop**.
3. Practice opening and closing a folder using **Double Click**.
4. Open Paint and draw a simple picture using the mouse.
5. Improve your Scratch project by:
    - Adding sound effects.
    - Creating a score counter.
    - Making sprites draggable.
    - Adding a "Congratulations!" message when the task is completed.

3DWEBSOFT FOUNDATION

Learning Outcomes

After completing this lesson, students will be able to:

- Identify the parts of a computer mouse.
- Perform **Click**, **Double Click**, **Drag**, and **Drop** confidently.
- Use the mouse to interact with desktop applications.
- Draw simple pictures in Paint using mouse controls.
- Build an interactive Scratch project that responds to mouse actions.
- Develop better hand-eye coordination and computer navigation skills through practice.
