3D WEBSOFT INC. FOUNDATION

SCHOOL FUTURE TECH PROGRAMM

Faculty Name :

Course Duration	: 5 Months (150 Days)
Classes	: Offline & Online
Daily Teaching	: 3 Hours
Total Hours	: 300 Hours

3D WEBSOFT FOUNDATION

LEVEL 1 – JUNIOR INNOVATORS (5th–6th Standard)

MODULE 1 – COMPUTER BASICS (Classes 1–20)

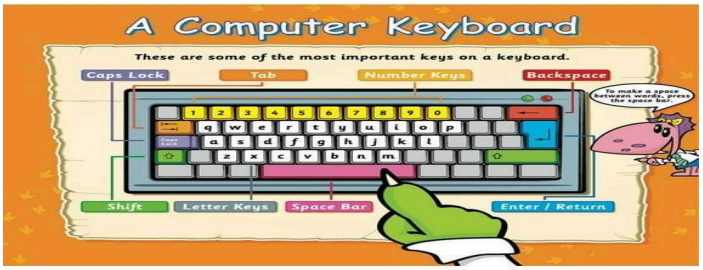

Class 11 — Keyboard Practice & Typing Activity (Complete Notes)

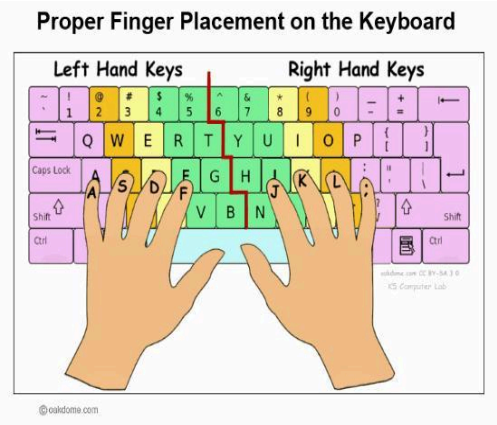

Complete Theory & Practical Notes

Learning Objectives

By the end of this class, students will be able to:-

- Identify the different sections of a keyboard.
- Understand the purpose of each key.
- Learn correct finger placement.
- Practice typing letters, words, and sentences.
- Improve typing speed and accuracy.
- Create a simple typing activity using Scratch.

Introduction

A ***keyboard*** is an ***input device*** used to enter letters, numbers, and symbols into a computer.

Whenever we type our name, write a story, or search on the internet, we use the keyboard.

Simple Definition

A keyboard is an input device used to type information into a computer.

Parts of a Keyboard

1. Alphabet Keys (A–Z)

Used for typing words and sentences.

Example:-

- A
- B
- C
- D

2. Number Keys (0–9)

Used for typing numbers.

Example:-

- 12345
- 98765

3. Function Keys (F1–F12)

Used for special computer functions.

Example:-

- F1 – Help
- F5 – Refresh

4. Arrow Keys

Move the cursor in four directions.

⬅ Left

➡ Right

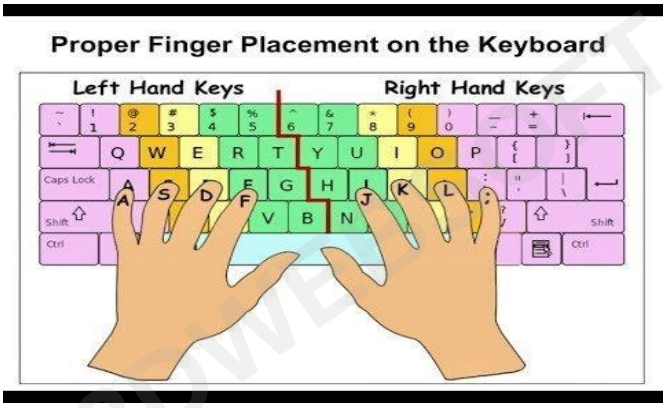

⬆ Up

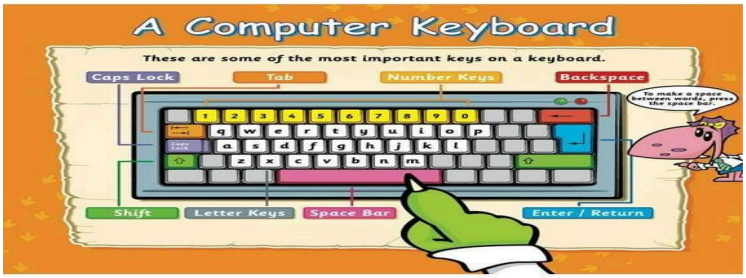

⬇ Down

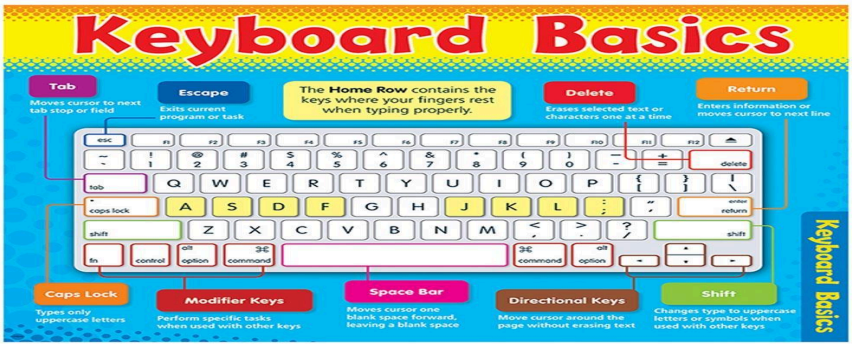

3DWEBSOFT FOUNDATION

5. Special Keys

Key	Use
Spacebar	Adds a space between words
Enter	Moves to the next line or confirms an action
Backspace	Deletes the character to the left
Delete	Removes the selected text or item
Shift	Types capital letters and special symbols
Caps Lock	Keeps letters in uppercase
Tab	Moves to the next field or indentation
Esc	Cancels an action

3D WEB TECH FOUNDATION

Correct Finger Placement

Place your fingers on the ***Home Row Keys.***

Left Hand

- Little Finger → A
- Ring Finger → S
- Middle Finger → D
- Index Finger → F

Right Hand

- Index Finger → J
- Middle Finger → K
- Ring Finger → L
- Little Finger → ;

Both thumbs rest on the ***Spacebar.***

Typing Rules

- Sit straight.
- Keep both feet on the floor.
- Look at the monitor as much as possible.
- Use all fingers, not just one.
- Press the keys gently.
- Practice every day.

3DWEBSOFT FOUNDATION

Practical Activity 1 – Keyboard Identification

Students identify the following keys on the keyboard:

- Alphabet Keys
- Number Keys
- Spacebar
- Enter Key
- Backspace
- Shift
- Caps Lock
- Arrow Keys

- Function Keys

Objective: Become familiar with the keyboard layout.

Practical Activity 2 – Typing Practice

Open ***Notepad*** or ***Microsoft Word.***

Type the following:-

My name is _____.

I study in Class _____.

I love computers.

I am learning keyboard typing.

Practice makes me better every day.

Save the file as:

MyTypingPractice.docx (or **MyTypingPractice.txt** if using Notepad)

Practical Activity 3 – Typing Challenge

Type the alphabet:

ABCDEFGHIJKLMNOPQRSTUVWXYZ

Type the numbers:

1234567890

Type the following words:

Computer
Keyboard
Monitor
Mouse
School
Future
Technology

3D WEBSOFT FOUNDATION

Robot
Scratch
Innovation

Practical Activity 4 – Speed Typing

Set a timer for ***2 minutes.***

Type this sentence as many times as possible:

Computers help us learn new things every day.

Count:

- Words typed
- Mistakes made

Try to improve in the next attempt.

Beginner Coding Activity (Scratch)

Students will use keyboard events to move a character.

Objective

Move the Scratch Cat using the arrow keys.

Steps

1. Open Scratch.
2. Choose the Cat sprite.
3. Add the following event blocks:
    - **When Right Arrow Key Pressed**
    - Change x by **10**
4. ***Repeat for:***
    - Left Arrow → Change x by **-10**
    - Up Arrow → Change y by **10**
    - Down Arrow → Change y by **-10**

Block Logic

3DWEBSOFT FOUNDATION

When Right Arrow Key Pressed

↓

Change x by 10

When Left Arrow Key Pressed

↓

Change x by -10

When Up Arrow Key Pressed

↓

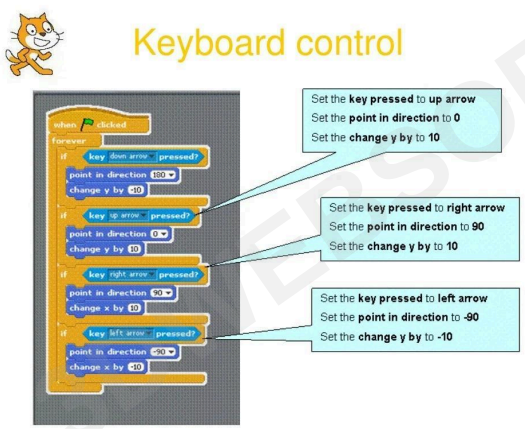

Change y by 10

When Down Arrow Key Pressed

↓

Change y by -10

Challenge: Create a simple maze and move the cat from the start to the finish using the keyboard.

CODERSOFT FOUNDATION

Classroom Activity

Find the Key

The teacher says a key name, and students quickly point to it.

Examples:-

- Enter
- Spacebar
- Backspace
- Caps Lock
- Shift
- Arrow Keys
- Number 5
- Letter M

Fun Game – Fast Fingers

The teacher displays a word.

Examples:-

- School
- Computer
- India
- Innovation
- Artificial
- Scratch

Students type the word correctly.

The student with the highest accuracy wins.

Quiz:-

Fill in the Blanks

1. A keyboard is an _____ device.
2. The _____ key gives a space between words.
3. The _____ key moves to a new line.

3DWEBSOFT FOUNDATION

4. The _____ key deletes letters to the left.
5. Arrow keys move the _____.

Answers

1. Input
2. Spacebar
3. Enter
4. Backspace
5. Cursor

Think and Answer

1. What is a keyboard?
2. Name four types of keys.
3. Which key is used to make capital letters?
4. Which key removes letters?
5. Why is correct finger placement important?

Homework

1. Write the names of **10 keyboard keys**.
2. Practice typing for **10 minutes** at home.
3. Type the following sentence five times:

I enjoy learning computers and typing every day.

Learning Outcome

After completing this lesson, students will be able to:

- Identify all major sections of a keyboard.
- Use the alphabet, number, function, arrow, and special keys correctly.
- Type simple words and sentences with improved accuracy.
- Follow proper typing posture and finger placement.
- Create a beginner Scratch program that responds to keyboard input.
- Develop confidence in keyboard usage for future programming and computer activities.
