3D WEBSOFT INC. FOUNDATION

SCHOOL FUTURE TECH PROGRAMM

Faculty Name :

Course Duration	: 5 Months (150 Days)
Classes	: Offline & Online
Daily Teaching	: 3 Hours
Total Hours	: 300 Hours

3DWEBSOFT FOUNDATION

LEVEL 1 – JUNIOR INNOVATORS (5th–6th Standard)

MODULE 1 – COMPUTER BASICS (Classes 1–20)

Class 4 — Parts of a Computer *(Complete Notes)*

Complete Theory & Practical Notes

Learning Objectives

By the end of this class, students will be able to:

- Identify the main parts of a computer.
- Explain the function of each computer part.
- Understand how different parts work together.
- Match computer parts with their uses.
- Create a simple interactive Scratch project about computer parts.

What are the Parts of a Computer?

3DWEBSOFT FOUNDATION

A computer is made up of different parts. Each part has a special job. When all the parts work together, the computer performs tasks quickly and accurately.

The main parts of a computer are:

1. CPU (Central Processing Unit)
2. Monitor
3. Keyboard
4. Mouse
5. Speakers

1. CPU (Central Processing Unit)

©DWEBSOFT FOUNDATION

What is a CPU?

The ***CPU (Central Processing Unit)*** is called the ***Brain of the Computer.*** It processes instructions, performs calculations, and controls all other parts of the computer.

Features

- Controls the computer
- Processes data
- Performs calculations
- Executes programs

Uses

- Runs software
- Stores and processes instructions
- Communicates with other computer parts

Fun Fact

Just like our brain controls our body, the CPU controls the computer.

2. Monitor

3DWEBSOFT VISUALIZATION

What is a Monitor?

A ***Monitor*** is an ***Output Device.*** It displays text, pictures, videos, and games on the screen.

Features

- Shows images and videos
- Displays results from the computer
- Available in different sizes

Uses

- Watching videos
- Reading documents
- Playing games
- Learning online

3. Keyboard

3D WORLD SOFT FOUNDATION

What is a Keyboard?

A ***Keyboard*** is an ***Input Device*** used to type letters, numbers, and symbols into the computer.

Main Keys

- Alphabet Keys (A–Z)

- Number Keys (0–9)
- Spacebar
- Enter Key
- Backspace Key
- Arrow Keys

Uses

- Typing text
- Writing documents
- Searching on the Internet
- Coding

4. Mouse

3DWEBSOFT FOUNDATION

What is a Mouse?

A ***Mouse*** is an ***Input Device*** used to point, click, drag, and select items on the computer screen.

Mouse Buttons

- Left Click
- Right Click
- Scroll Wheel

Uses

- Opening files
- Selecting icons
- Drawing
- Playing games

EBSOFT FOUNDATION

5. Speakers

What are Speakers?

Speakers are ***Output Devices*** that produce sound from the computer.

Uses

- Listening to music
- Watching videos
- Online classes
- Games
- Video calls

Fun Fact

Speakers convert digital signals into sound that we can hear.

3DWEBSOFT FOUNDATION

Input and Output Devices

Device	Type	Main Function
CPU	Processing Device	Processes information
Monitor	Output Device	Displays images and text
Keyboard	Input Device	Types letters and numbers
Mouse	Input Device	Controls the pointer
Speakers	Output Device	Produces sound

Number of Input vs Output Devices

Computer Device Categories

Classification of the main computer parts in this lesson.

Classroom Activity

Activity 1 – Identify the Parts

Show students a desktop computer.

Ask them to identify:

- CPU
- Monitor
- Keyboard
- Mouse
- Speakers

Discussion Questions

- Which part is called the brain of the computer?
- Which part shows pictures?
- Which part helps you type?
- Which part moves the pointer?
- Which part produces sound?

SDWEBSOFT FOUNDATION

Activity 2 – Label the Parts

Students draw a desktop computer and label:

- CPU
- Monitor
- Keyboard
- Mouse
- Speakers

Practical Coding Activity (Scratch)

Project Title

"Meet the Computer Parts"

Objective

Students create an interactive Scratch project where clicking a computer part explains its function.

Step 1

Open Scratch.

Create a new project.

Delete the default Cat sprite.

Step 2

Add Sprites

- CPU
- Monitor
- Keyboard
- Mouse
- Speaker

Use a desktop computer background.

Step 3

Programming

Green Flag

when green flag clicked
say "Welcome! Click the computer part to learn about it." for 3 seconds

CPU Sprite

when this sprite clicked
say "I am the CPU. I am the brain of the computer." for 4 seconds

Monitor Sprite

when this sprite clicked
say "I display text, pictures, and videos." for 4 seconds

Keyboard Sprite

when this sprite clicked
say "I help you type letters and numbers." for 4 seconds

©DWEBSOFT FOUNDATION

Mouse Sprite

when this sprite clicked
say "I help you point, click, and drag." for 4 seconds

Speaker Sprite

when this sprite clicked
say "I play music and other sounds." for 4 seconds

Advanced Scratch Challenge

Create a quiz using variables.

Example:-

ask "Which part is called the brain of the computer?" and wait

If the answer is:

CPU

Then

change Score by 1
say "Correct!" for 2 seconds

Else

say "Try Again!" for 2 seconds

Add more questions:

- Which device is used for typing?
- Which device shows pictures?
- Which device produces sound?
- Which device controls the pointer?

Display the final score at the end.

AI Connection

Discuss with students:

3DWEBSOFT FOUNDATION

- Can a computer work without a CPU?
- Which devices help us give information to the computer?
- Which devices help us receive information from the computer?
- How do speakers and monitors help us interact with AI applications?

Fun Quiz:-

1. Which part is called the **Brain of the Computer?**
    - A) Monitor
    - ***B) CPU***
    - C) Mouse
2. Which device is used for typing?
    - A) Speaker
    - **B) Keyboard**
    - C) Monitor
3. Which device displays pictures?
    - A) CPU
    - B) Mouse
    - **C) Monitor**
4. Which device produces sound?
    - A) Keyboard
    - B) Mouse
    - **C) Speakers**
5. Which device controls the pointer?
    - A) Monitor
    - **B) Mouse**
    - C) CPU

3DWEBSOFT FOUNDATION

Homework

1. Draw and label the five main parts of a computer.
2. Write ***two functions*** of each part.
3. Create a table showing **Input, Output,** and **Processing** devices.
4. Improve your Scratch project by adding sounds, animations, or a score counter.

Learning Outcomes

By the end of this class, students will be able to:-

- Identify the main parts of a computer.

- Explain the function of the CPU, Monitor, Keyboard, Mouse, and Speakers.
- Classify devices as **Input, Output**, or **Processing.**
- Build an interactive Scratch project to explain computer parts.
- Confidently recognize and use common computer hardware in daily life.

3DWEBSOFT FOUNDATION
