3D WEBSOFT INC. FOUNDATION

SCHOOL FUTURE TECH PROGRAMM

Faculty Name :

Course Duration	: 5 Months (150 Days)
Classes	: Offline & Online
Daily Teaching	: 3 Hours
Total Hours	: 300 Hours

3DWEBSOFT FOUNDATION

LEVEL 1 – JUNIOR INNOVATORS (5th–6th Standard)

MODULE 1 – COMPUTER BASICS (Classes 1–20)

Class 9 — Starting and Shutting Down a Computer, Desktop Icons & Taskbar (Complete Notes)

Complete Theory & Practical Notes

Learning Objectives:-

By the end of this class, students will be able to:-

- Understand the correct way to start and shut down a computer.
- Identify the parts of the Windows desktop.
- Recognize common desktop icons.
- Explain the purpose of the Taskbar.
- Perform basic desktop operations.
- Create an interactive Scratch project about the Windows desktop.

Introduction

3DWEBSOFT FOUNDATION

A computer should always be ***started and shut down properly.*** This helps protect your files, keeps the operating system working correctly, and prevents data loss.

After the computer starts, you will see the ***Desktop***, which contains icons, the taskbar, and the wallpaper.

Part 1: Starting a Computer

What is Starting a Computer?

Starting a computer means ***turning it on*** and allowing the operating system to load.

This process is called ***Booting.***

Steps to Start a Computer

Step 1

Turn on the ***Power Supply (UPS or Main Switch).***

Step 2

Press the ***Power Button*** on the CPU or Laptop.

Step 3

Wait for Windows to load.

Step 4

Enter the password (if required).

Step 5

The Windows Desktop appears.

Booting Process

Power ON

Part 2: Shutting Down a Computer

What is Shutting Down?

Shutting down means ***closing all programs safely and turning off the computer.***

Never switch off the power directly while the computer is working.

Steps to Shut Down

1. Save your work.
2. Close all open programs.
3. Click the ***Start*** button.
4. Click the ***Power*** icon.
5. Select ***Shut Down***.
6. Wait until the computer turns off completely.

Why Should We Shut Down Properly?

Protects files

Prevents data loss

Keeps the operating system healthy

Saves electricity

3DWEBSOFT FOUNDATION

Part 3: Desktop

3DWEBSOFT FOUNDATION

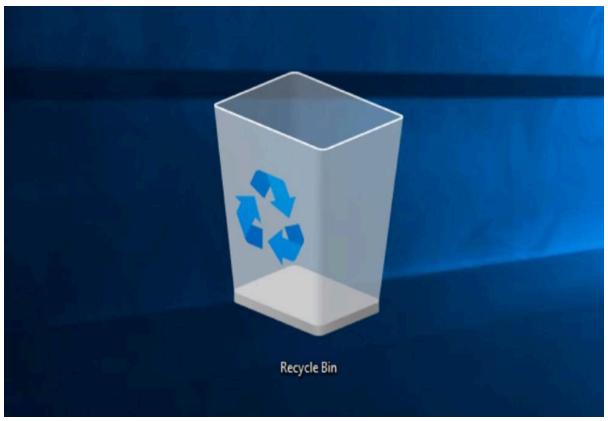

What is the Desktop?

The **Desktop** is the main screen you see after Windows starts.

It contains:-

- Icons
- Wallpaper
- Taskbar
- Start Button

Common Desktop Icons

Recycle Bin

Stores deleted files until they are permanently removed.

This PC (My Computer)

Shows drives, folders, and storage devices.

Documents Folder

Stores school projects, documents, and files.

Web Browser

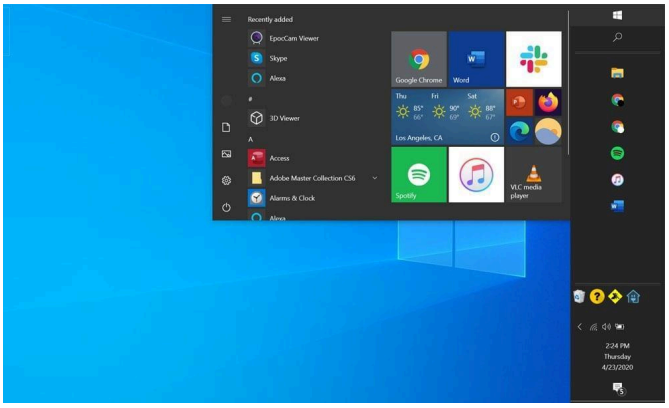

Used to browse websites on the Internet.

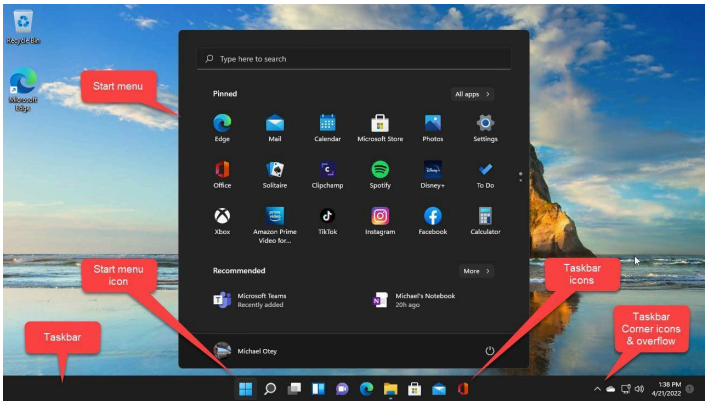

Paint

Used for drawing pictures.

3DWEBSOFT FOUNDATION

Part 4: Taskbar

What is the Taskbar?

The ***Taskbar*** is the long bar usually found at the bottom of the desktop.

It helps users quickly open and switch between applications.

Parts of the Taskbar

Start Button

Open the Start Menu.

Search Box

Finds files, apps, and settings.

Pinned Apps

Quickly opens favorite programs.

Date & Time

Shows the current date and time.

System Tray

Contains:

- Wi-Fi
- Battery
- Volume

SDWEBSOFT FOUNDATION

- Notifications

Windows Desktop Components

Component	*Function*
Desktop	Main workspace
Icons	Open files and applications
Taskbar	Quick access to apps
Start Button	Opens Start Menu
Search Box	Searches files and apps
Recycle Bin	Stores deleted files

Desktop Components Overview

Main Windows Desktop Components

Illustrative importance of common desktop components for beginners.

Classroom Practical Activity

Activity 1 – Start the Computer

Students practice:-

- Turn on the monitor.
- Press the computer's power button.
- Wait for Windows to load.
- Identify the desktop.

Activity 2 – Identify Desktop Icons

Students locate:-

- Recycle Bin
- This PC
- Documents
- Paint
- Browser

Teacher asks:-

- Which icon stores deleted files?
- Which icon opens computer drives?

Activity 3 – Explore the Taskbar

Students:

- Click the **Start** button.
- Open **Calculator**.
- Open **Paint**.
- Switch between both programs using the Taskbar.
- Close both applications.

Activity 4 – Shut Down the Computer

Students follow the correct shutdown steps:

1. Save work.
2. Close all applications.
3. Click **Start**.
4. Select **Power**.
5. Click **Shut Down**.

3DWEBSOFT FOUNDATION

Practical Coding Activity (Scratch)

Project Title

"Windows Desktop Explorer"

Objective

Students create an interactive Scratch project where clicking each desktop item explains its purpose.

Step 1

Open **Scratch**.

Create a new project.

Delete the default Cat sprite.

Step 2

Add Sprites

- Desktop
- Start Button
- Recycle Bin
- Taskbar
- Folder
- Computer Icon

Choose a Windows desktop background.

SOWEBSOFT FOUNDATION

Step 3 – Programming

Green Flag

when green flag clicked
say "Welcome! Click any desktop item to learn about it." for 3 seconds

Start Button

when this sprite clicked
say "I open the Start Menu." for 3 seconds

Recycle Bin

when this sprite clicked
say "I temporarily store deleted files." for 3 seconds

Taskbar

when this sprite clicked
say "I help switch between open programs." for 3 seconds

This PC

when this sprite clicked
say "I show the computer's drives and folders." for 3 seconds

Folder

when this sprite clicked
say "I store files and documents." for 3 seconds

Advanced Scratch Challenge

Create a quiz using a **Score** variable.

Question 1

ask "Which button opens the Start Menu?" and wait

If answer = Start Button

Then

change Score by 1
say "Correct!" for 2 seconds

Else

say "Try Again!" for 2 seconds

3DWEBSOFT FOUNDATION

Additional Questions

- Which icon stores deleted files?
- Which part helps switch between open applications?
- What is the first screen after Windows starts?
- What should you do before shutting down a computer?

Display the total score after the quiz.

AI Connection

Discuss with students:-

- Why should we save our work before shutting down?

- Can AI applications run from the desktop like other software?
- Which desktop icon would you use to open a browser and access AI tools?
- Why is it important to keep the desktop organized?

Fun Quiz:-

1. What is the first screen after Windows starts?

- A) Taskbar
- ***B) Desktop***
- C) Paint

2. Which icon stores deleted files?

- A) This PC
- ***B) Recycle Bin***
- C) Browser

3. Which button opens the Start Menu?

- A) Taskbar
- ***B) Start Button***
- C) Folder

4. Where is the Taskbar usually located?

- A) Top
- ***B) Bottom***
- C) Left only

5. What should you do before shutting down the computer?

- A) Turn off the monitor immediately
- ***B) Save your work and close applications***
- C) Remove the keyboard

Homework:-

1. Draw and label the Windows desktop.
2. List ***five desktop icons*** and write their uses.

3DWEBSOFT FOUNDATION

3. Practice starting and shutting down a computer correctly (with an adult or teacher if needed).
4. Create a comparison table showing ***Desktop, Icons***, and ***Taskbar*** with their functions.
5. Improve your Scratch project by adding:
    - Background music
    - Click animations
    - A score counter
    - A final "Well Done!" message.

Learning Outcomes:-

After completing this lesson, students will be able to:-

- Start and shut down a computer safely.
- Identify the main parts of the Windows desktop.
- Recognize common desktop icons and explain their uses.
- Describe the purpose of the Taskbar and Start button.
- Perform basic desktop navigation independently.
- Create an interactive Scratch project to demonstrate knowledge of the Windows desktop and its components.
