3D WEBSOFT INC. FOUNDATION

FUTURE TECH SCHOOL PROGRAM

Faculty Name :

Course Duration : 5 Months

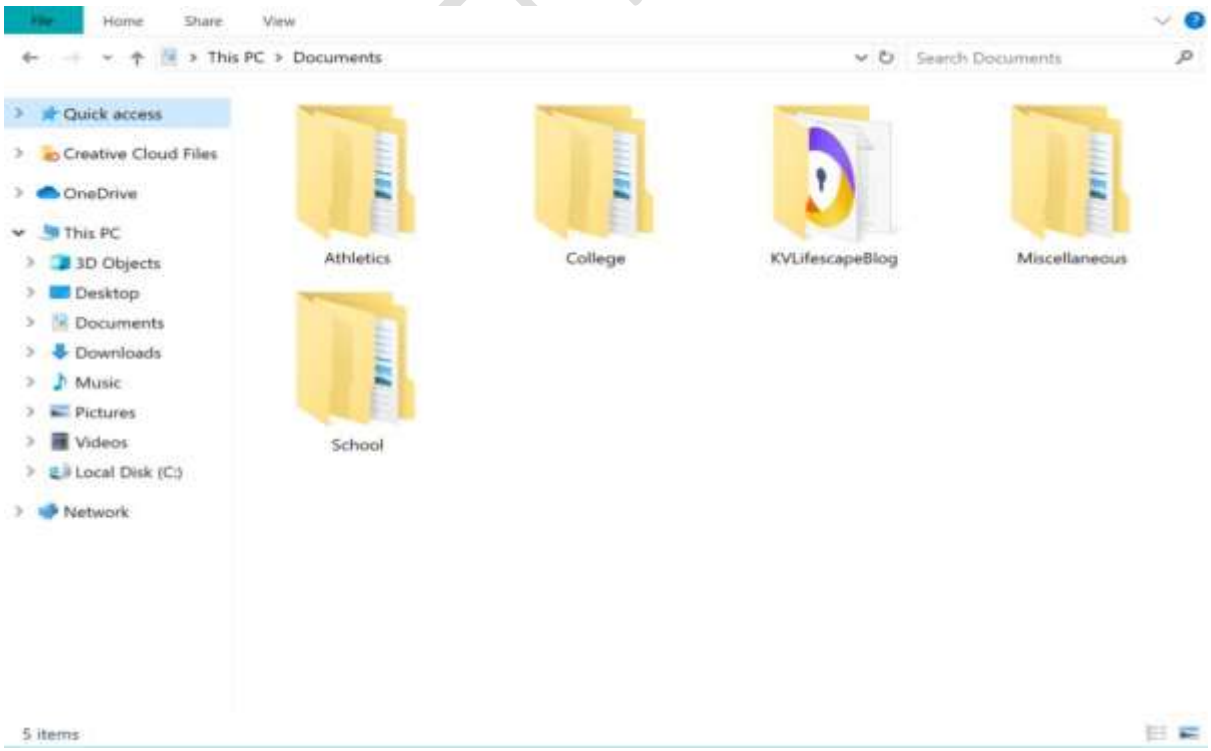

Classes : Offline & Online

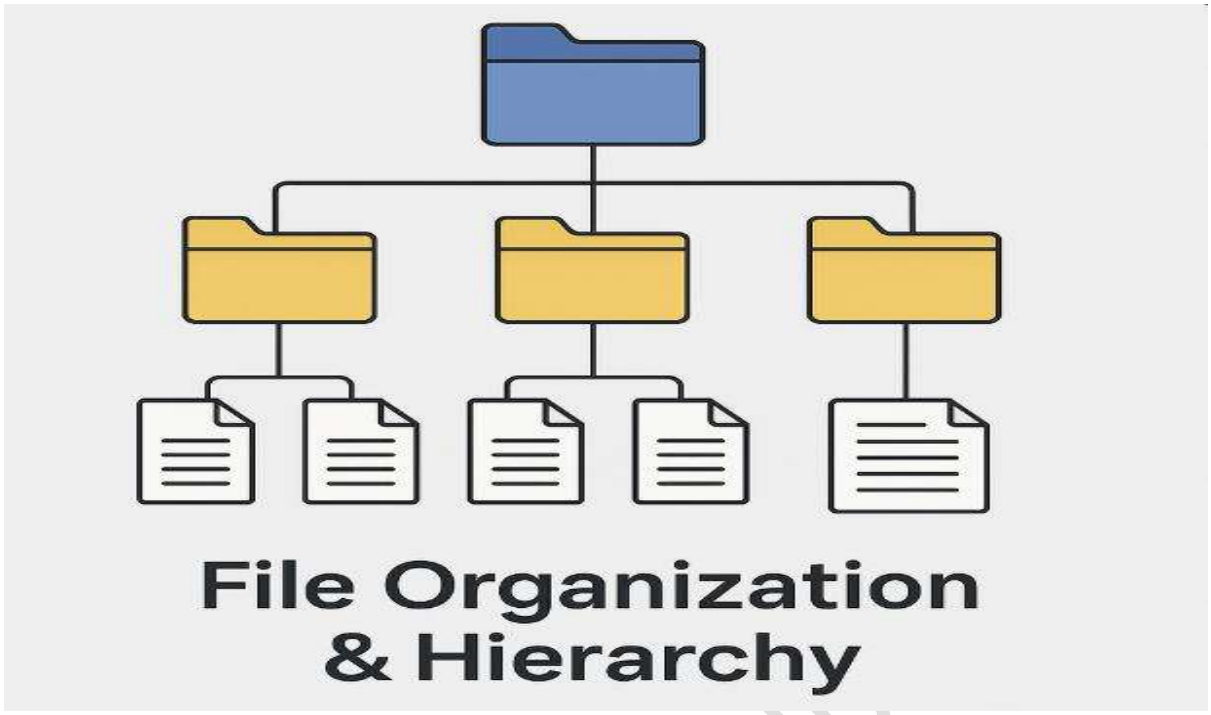

Daily Teaching : 2 Hours

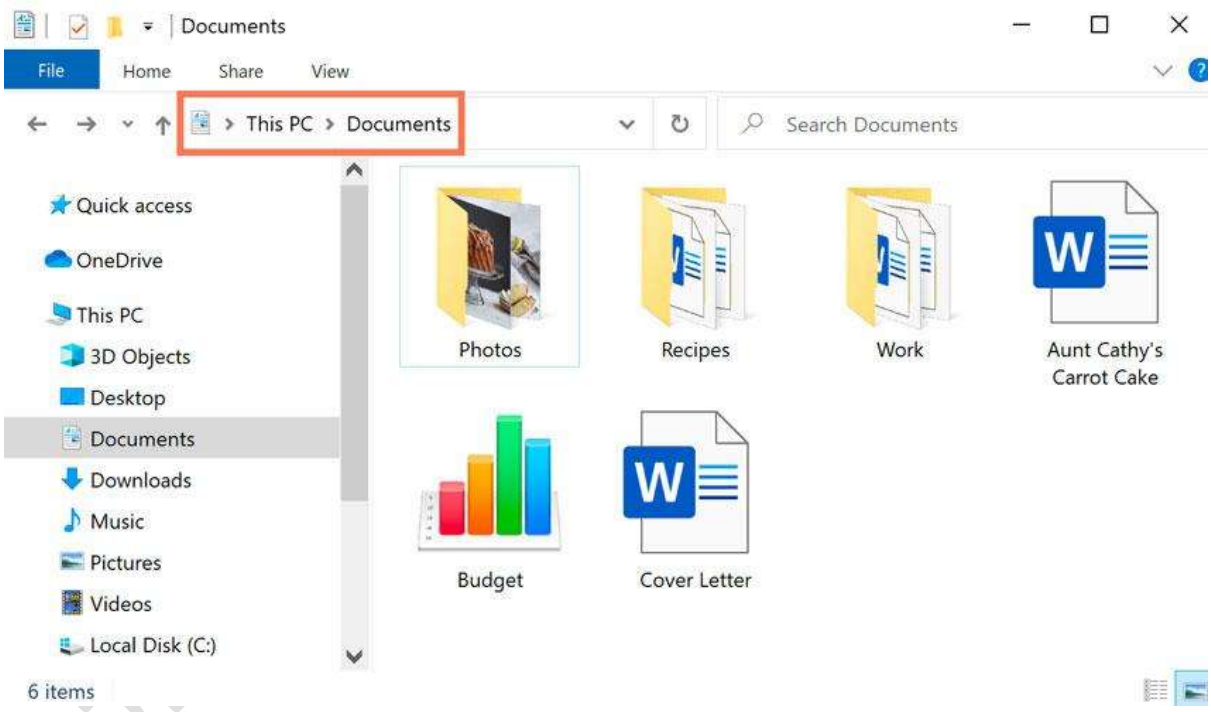

Total Classes : 100

Level 2 – Young Technologist (7th–8th Standard)

Class 6: Files & Folders

Learning Objectives

By the end of this lesson, students will be able to:

- Understand what **files** and **folders** are.
- Explain the importance of organizing files.
- Create, rename, copy, move, and delete files and folders.

- Identify different types of files.
- Use **Windows File Explorer** to manage files.
- Practice safe file management.

Introduction

Imagine your school bag without separate notebooks.

All your books, papers, and homework are mixed together. It would be difficult to find anything!

A computer works in the same way.

- **Files** store information.
- **Folders** organize files into groups.

Using files and folders helps us keep our work neat and easy to find.

What is a File?

A **File** is a collection of information stored on a computer.

A file can contain:

- 📝 Text
- 🖼️ Pictures
- 🎵 Music
- 🎥 Videos
- 📊 Data
- 💻 Programs

Simple Definition

A file is like a **notebook** that stores information.

What is a Folder?

A **Folder** is a container used to organize and store files and other folders.

3DWEBSOFT FOUNDATION

Simple Definition

A folder is like a **school bag** that keeps your notebooks organized.

Real-Life Example

Real Life	**Computer**
School Bag	Folder
Notebook	File
Bookshelf	Drive
Library	File System

Types of Files

FOUNDATION

FILE EXTENSIONS

File extensions are the letters after the full stop at theed of a filename. They tell the computer what type of file it is.

TEXT AND DATA

.doc	**Word Processing Document** Used mostly for Microsoft Word.	.xls	**Excel Spreadsheet** Used for Microsoft Excel.
.docx	Document using the Open XML standard, which stores files in a zip package.	.xlsx	Spreadsheet using the Open XML standard, which stores files in a zip package.
.rtf	**Rich Text Format** A text file format that enables various formatting options.	.ppt	**PowerPoint Presentation** Used for Microsoft PowerPoint.
.txt	**Plain Text** A standard, unformatted text document.	.csv	**Comma Separated Values** A file containing data sets that are separated by commas.

AUDIO AND VIDEO

.mp3	**MP3** Compressed audio file.	.flv	**Flash Video** Flash-compatible video; used on websites such as YouTube.
.aac	**Advanced Audio Coding** Compressed audio file offering higher performance than MP3.	.mp4	**MPEG-4** MPEG-4 compressed movie or video clip.
.wma	**Windows Media Audio** Compressed audio file.	.wmv	**Windows Media Video** Video file based on Microsoft's Advanced Systems Format.

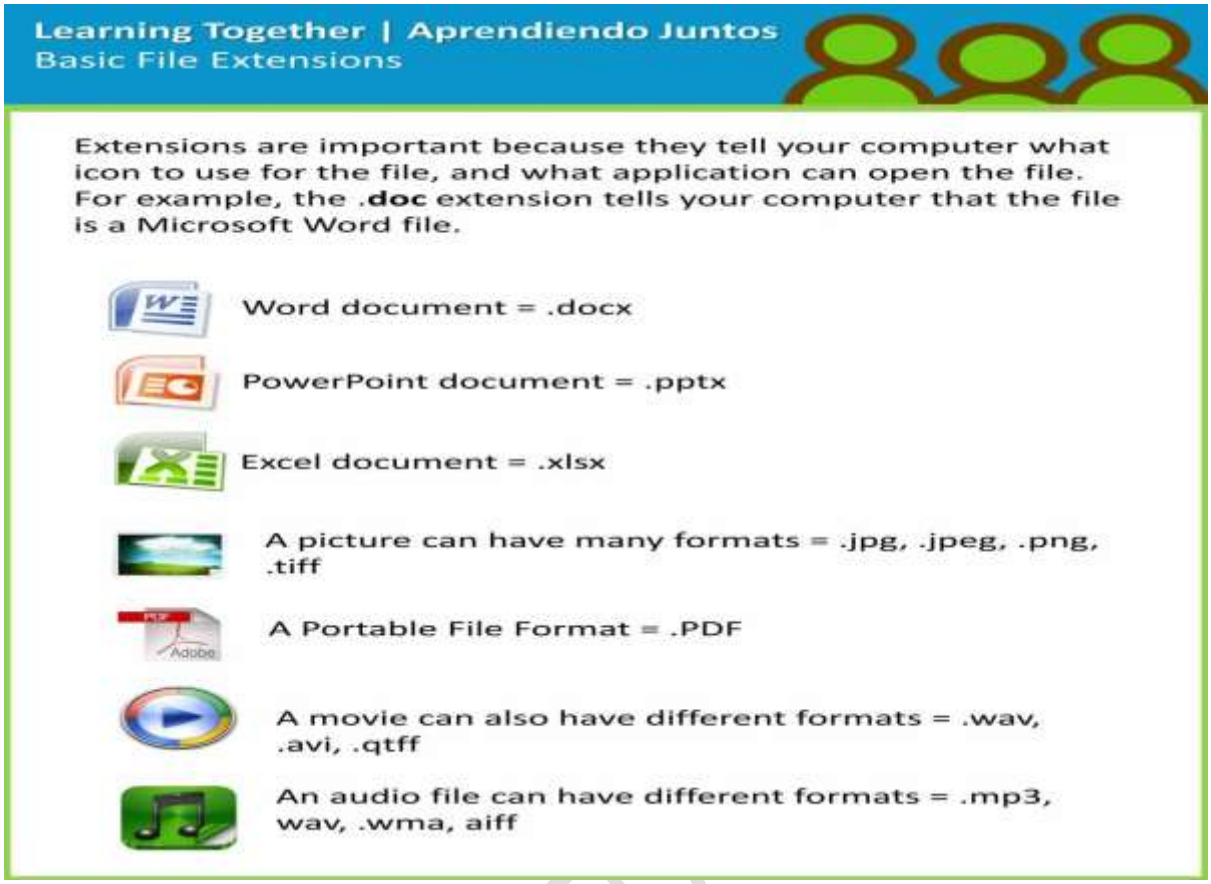

IMAGE

.gif	**Graphical Interchange Format** A raster image file used mainly for web graphics and animation.	.tif	**Tagged Image File** High-quality image files, often saved uncompressed.
.jpg	**JPEG** A compressed image file commonly used for storing digital photos.	.ai	**Adobe Illustrator File** Image files created with the graphics editing program Adobe Illustrator.
.png	**Portable Network Graphic** Image files used mainly for web graphics; better quality than GIFs.	.psd	**Adobe Photoshop File** Image files created with the image editing program Adobe Photoshop.

WEB, EXECUTABLE AND OTHER

.html	**Hypertext Markup Language** Language used to build web pages.	.com	**DOS Command** Used to execute a list of instructions - not to be confused with the .com suffix.
.css	**Cascading Style Sheet** Used to format the content of web pages.	.zip	**Zipped** A file format that compresses files to reduce their size.
.exe	**Windows Executable** Windows-based executable files that do not run on a Mac OS.	.pdf	**Portable Document Format** Used for saving documents in a standard format.

daydream

File Type	Extension	Example
Word Document	.docx	Homework.docx
Text File	.txt	Notes.txt
PDF File	.pdf	Science.pdf
Image File	.jpg, .png	Photo.jpg
Audio File	.mp3	Song.mp3
Video File	.mp4	Holiday.mp4
Presentation	.pptx	Project.pptx
Spreadsheet	.xlsx	Marks.xlsx
Python Program	.py	Hello.py

3DWEBSOFT FO

Types of Folders

Folders can contain:

- Documents
- Pictures
- Videos
- Music
- School Projects
- Homework
- Other folders (Subfolders)

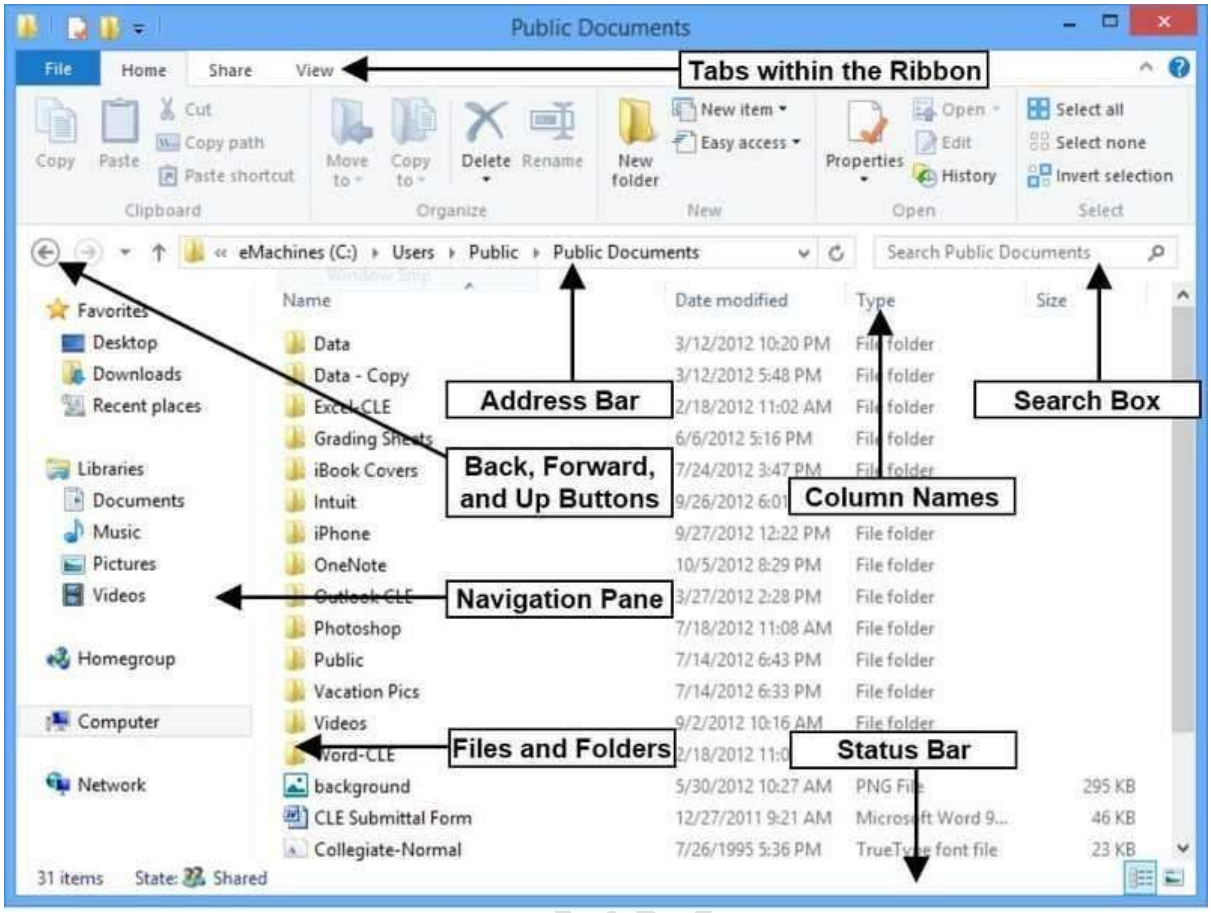

Example Folder Structure

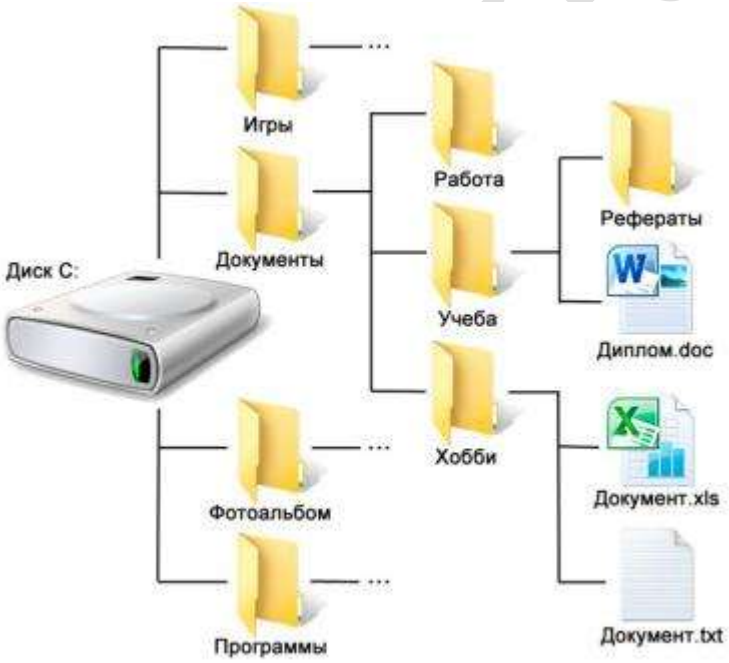

My School

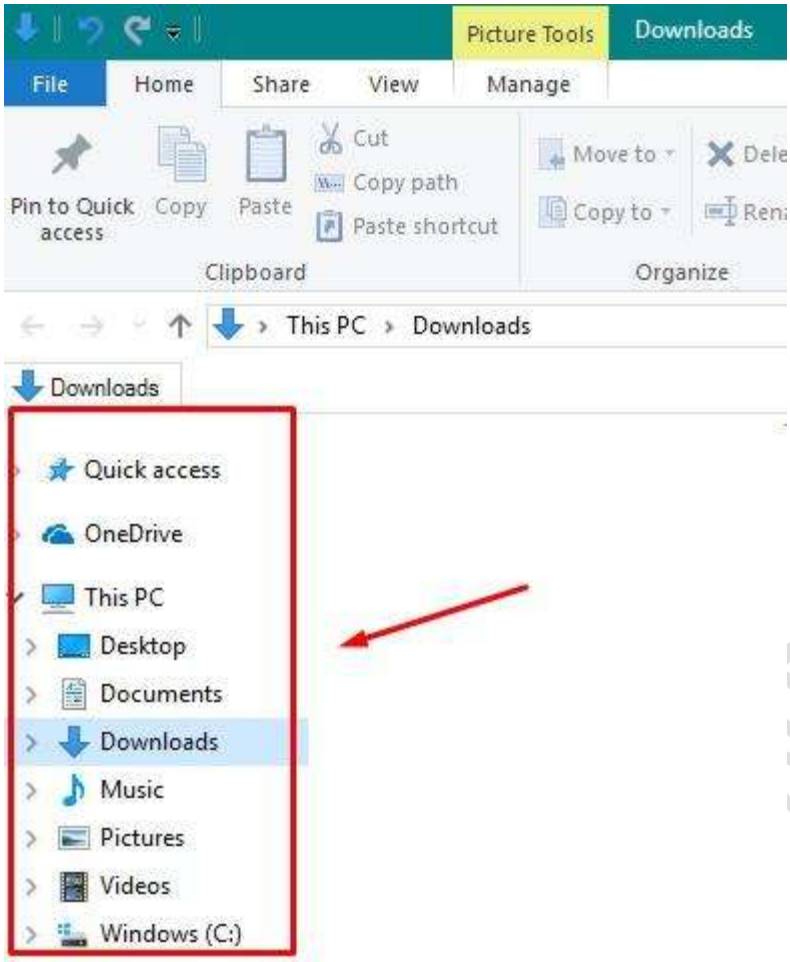

```
|
├── English
|     ├── Homework.docx
|     └── Notes.pdf
|
├── Science
|     ├── Project.pptx
|     └── Diagram.png
|
└── Python
      ├── Hello.py
      └── Calculator.py
```

File Explorer is a Windows application used to manage files and folders.

Using File Explorer, we can:

- Open files
- Create folders
- Rename files
- Copy files
- Move files
- Delete files
- Search for files

Common Folders in Windows

3DWEBSOFT FOUNDATION

Folder	Purpose
Desktop	Stores shortcuts and files shown on the desktop
Documents	Stores documents and assignments
Downloads	Stores downloaded files
Pictures	Stores photos and images
Music	Stores audio files
Videos	Stores videos

File Operations

1. Create a Folder

Steps:

1. Right-click on the Desktop.
2. Select **New → Folder**.
3. Type a folder name.
4. Press **Enter**.

2. Rename a Folder

Steps:

1. Right-click the folder.
2. Select **Rename**.
3. Type a new name.
4. Press **Enter**.

3. Copy a File

Shortcut:

Ctrl + C

Paste using:

3DWEBSOFT FOUNDATION

Ctrl + V

4. Move a File

Steps:

1. Select the file.
2. Press **Ctrl + X** (Cut).
3. Open another folder.
4. Press **Ctrl + V** (Paste).

5. Delete a File

Steps:

1. Select the file.
2. Press the **Delete** key.
3. The file moves to the **Recycle Bin**.

6. Restore a Deleted File

1. Open the **Recycle Bin**.
2. Right-click the file.
3. Select **Restore**.

Searching for Files

If you forget where a file is saved:

1. Open **File Explorer**.
2. Use the **Search** box.
3. Type the file name.
4. Press **Enter**.

Tips for Organizing Files

3DWEBSOFT FOUNDATION

- Give files meaningful names.
- Create separate folders for each subject.
- Delete unwanted files.
- Keep your Desktop clean.
- Back up important files regularly.

Safe File Management

- Save your work frequently.
- Do not delete important files.
- Scan USB drives for viruses.
- Avoid opening files from unknown sources.
- Keep backup copies of important projects.

3DWEBSOFT FOUNDATION

Practical Activities

Practical Activity 1 – Create Subject Folders

Objective

Learn to create and organize folders.

Instructions

1. Open the **Desktop**.
2. Create a folder named **My School Work**.
3. Inside it, create these folders:
    - English
    - Mathematics
    - Science
    - Social Studies
    - Python

4. Open each folder to check it.

Practical Activity 2 – Create and Save a File

Instructions

1. Open **Notepad**.
2. Type:

My Name: _____

Class: _____

School: _____

I love learning computers.

3. Save the file as:

Introduction.txt

4. Save it inside the **English** folder.

Practical Activity 3 – Copy and Move Files

Instructions

1. Open the **English** folder.
2. Copy **Introduction.txt** to the **Science** folder.
3. Move it from **Science** to the **Python** folder.
4. Check that the file is in its new location.

Practical Activity 4 – Rename a Folder

Rename:

Python

to

3DWEBSOFT FOUNDATION

Python Programming

Practical Activity 5 – Delete and Restore

1. Delete **Introduction.txt**.
2. Open the **Recycle Bin**.
3. Restore the file.
4. Confirm it is back in the original folder.

Classroom Activity

Identify the File Type

File Name	Type
Holiday.jpg	Image
Music.mp3	Audio
Science.pdf	PDF Document
Homework.docx	Word Document
Movie.mp4	Video
Program.py	Python File

3DWEBSOFT FOUNDATION

Quick Quiz

1. What is a file?

A. A folder

B. A collection of stored information ✅

C. A printer

D. A keyboard

2. What is a folder?

A. A game

B. A container used to organize files ✅

C. A monitor

D. A mouse

3. Which shortcut copies a file?

A. Ctrl + X

B. Ctrl + C ✅

C. Ctrl + V

D. Ctrl + Z

4. Which shortcut pastes a copied file?

A. Ctrl + P

B. Ctrl + V ✅

C. Ctrl + D

D. Ctrl + Z

5. Where do deleted files usually go first?

A. Downloads

B. Desktop

C. Recycle Bin ✅

D. Documents

3DWEBSOFT FOUNDATION

Home Assignment

1. Draw a folder structure for your school subjects.
2. Write **five file types** and their extensions.
3. Create a folder named **My Projects** (if a computer is available).

4. List the steps to:
    - Create a folder
    - Rename a folder
    - Copy a file
    - Delete a file
5. Write why it is important to organize files and folders.

Lesson Summary

Today we learned:

- The meaning of **files** and **folders**.
- Different file types and extensions.
- The purpose of Windows File Explorer.
- Common Windows folders.
- How to create, rename, copy, move, search, delete, and restore files.
- Safe file management practices.
- Practical file organization activities.

Learning Outcomes

By the end of this lesson, students will be able to:

- Define files and folders.
- Identify common file types and extensions.
- Use File Explorer to manage files and folders.
- Create, rename, copy, move, search, and delete files confidently.
- Organize school work using folders.
- Follow good file management and computer safety practices.
