3D WEBSOFT INC. FOUNDATION

FUTURE TECH SCHOOL PROGRAM

Faculty Name :

Course Duration : 5 Months

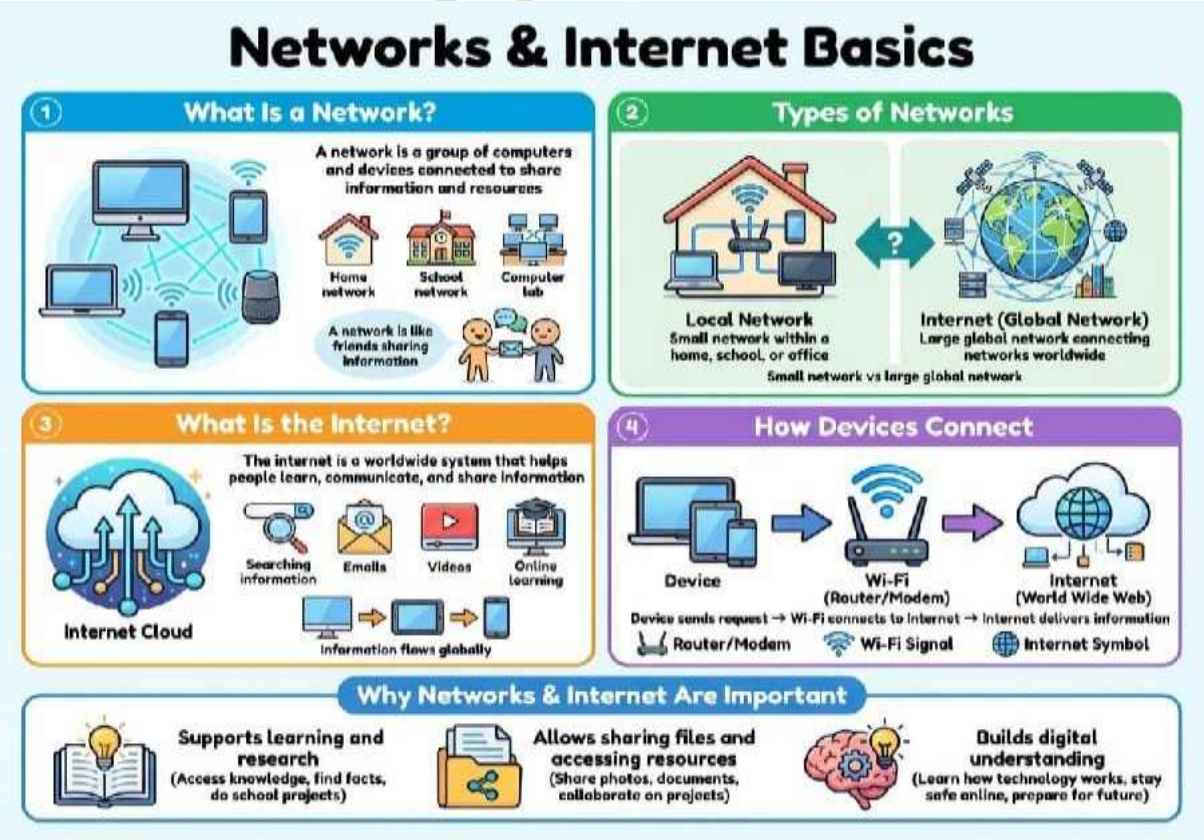

Classes : Offline & Online

Daily Teaching : 2 Hours

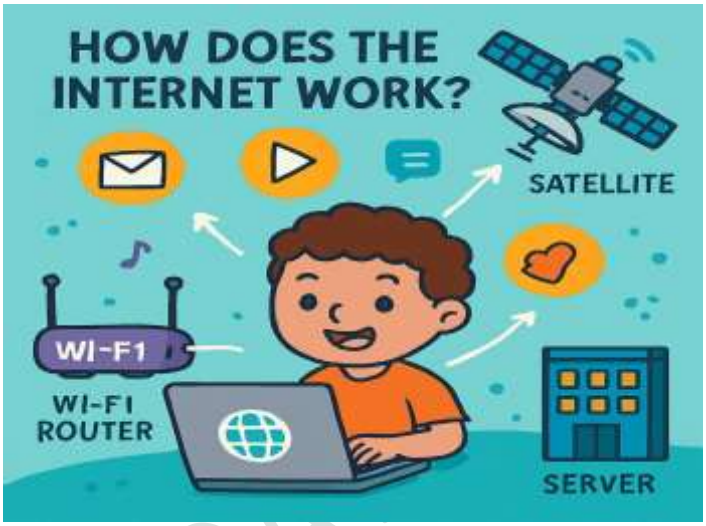

Total Classes : 100

Level 2 – Young Technologist (7th–8th Standard)

Class 7: Internet Basics

Learning Objectives

By the end of this lesson, students will be able to:

- Understand what the Internet is.
- Explain how the Internet works.
- Identify different ways to connect to the Internet.
- Learn common Internet services.
- Understand the advantages and disadvantages of the Internet.
- Practice safe and responsible Internet usage.

Introduction

Today, millions of people use the **Internet** every day to:

- 📚 Learn new things
- 🎥 Watch educational videos
- 💬 Communicate with friends and family
- 🛒 Shop online
- 🎮 Play games
- 🌍 Explore the world

3DWEBSOFT FOUNDA

The Internet has become an important part of our daily lives.

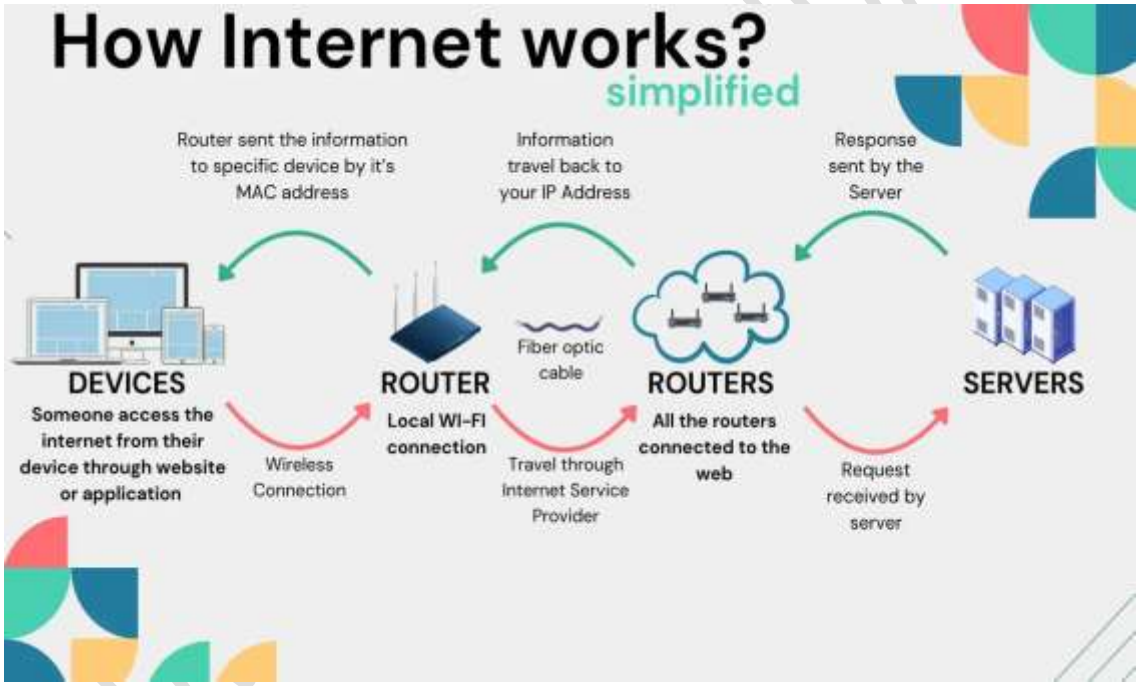

What is the Internet?

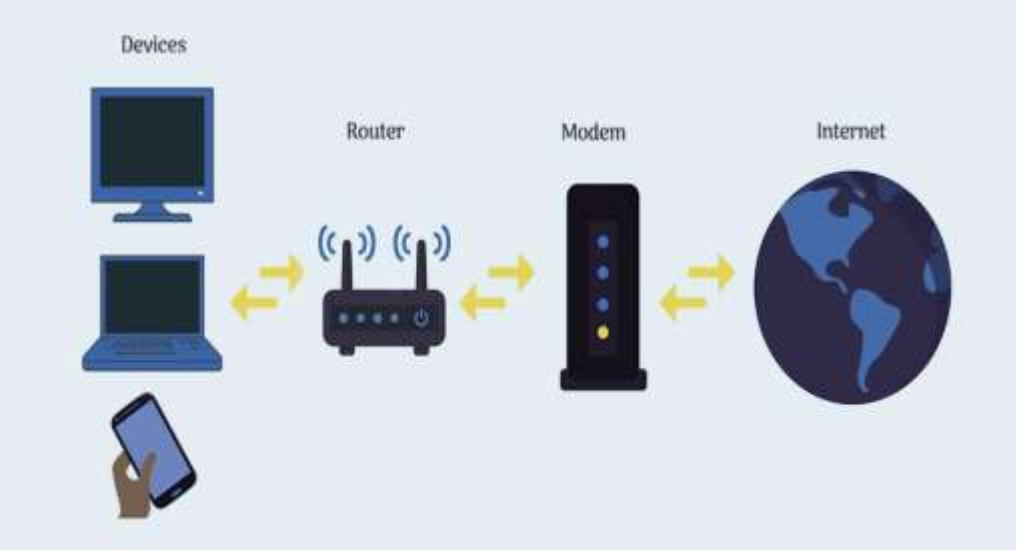

The **Internet** is a **global network of connected computers and devices** that allows people to share information and communicate with each other.

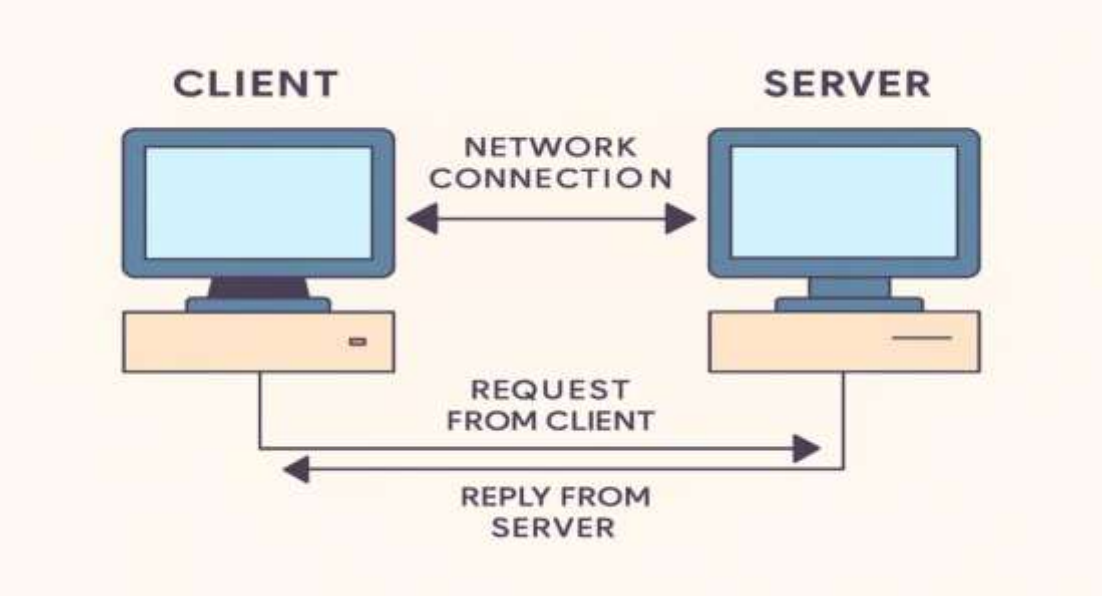

Simple Definition

The Internet is like a **giant digital highway** that connects computers and mobile devices all over the world.

How Does the Internet Work?

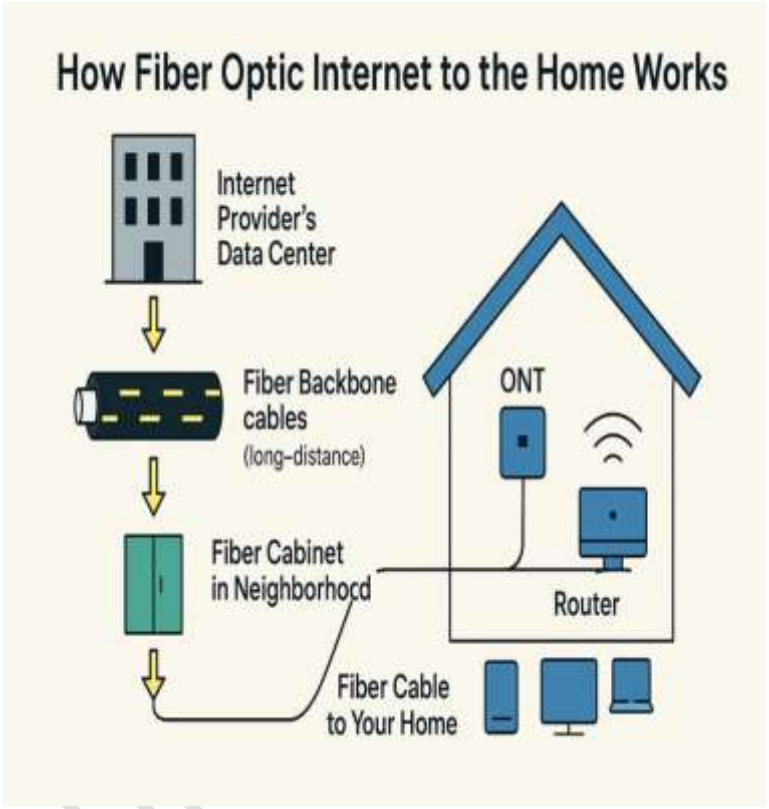

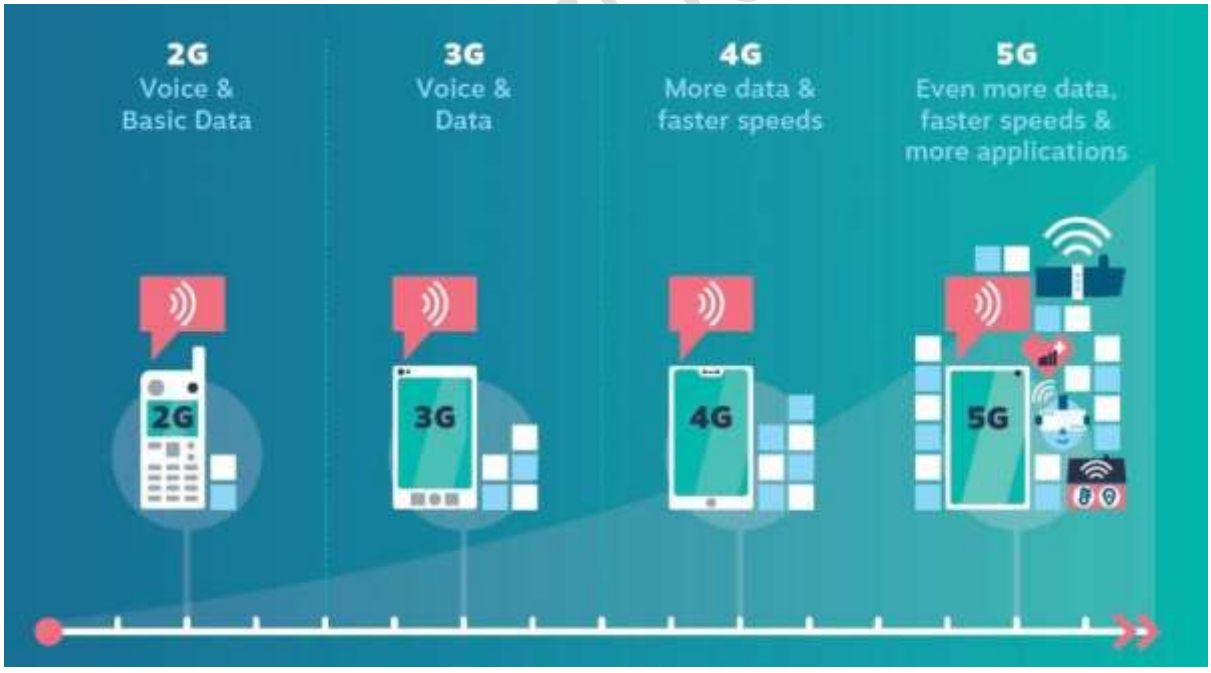

Basic Steps

1. Your device (computer, tablet, or phone) connects to the Internet through **Wi-Fi**, **mobile data**, or a **broadband connection**.
2. The request is sent through a **router** to an **Internet Service Provider (ISP)**.
3. The ISP connects your request to servers around the world.
4. The server sends the requested information back to your device.
5. The web page or video appears on your screen.

Types of Internet Connections

1. Wi-Fi

- Wireless Internet connection.
- Used in homes, schools, and offices.

- Connects multiple devices.

2. Mobile Data (4G / 5G)

- Internet provided by a mobile phone network.
- Used on smartphones and tablets.

3. Broadband/Fiber

- High-speed wired Internet connection.
- Reliable for homes, schools, and businesses.

4. Satellite Internet

- Uses satellites to provide Internet in remote areas.

Devices Needed for the Internet

Device	Purpose
💻 Computer/Laptop	Browse websites and learn online
📱 Smartphone	Access apps and websites
📡 Router	Shares the Internet connection
🌐 Modem	Connects to the Internet service
📶 Wi-Fi	Wireless connection for devices

What is the World Wide Web (WWW)?

The **World Wide Web (WWW)** is a collection of websites and web pages that we access using the Internet.

Example Websites

- Educational websites

3DWEBSOFT FOUNDATION

- News websites
- School websites
- Government websites

Note: The **Internet** is the network, while the **Web** is one of the services that runs on it.

What is a Website?

A **website** is a collection of related web pages that provide information or services.

Examples

- School websites
- Educational portals
- Science websites
- Sports websites

What is a Web Browser?

FOUNDATION

A **web browser** is software used to open and view websites.

Popular Web Browsers

- Google Chrome
- Microsoft Edge
- Mozilla Firefox
- Safari
- Opera

Browser Uses

- Search information
- Open websites
- Watch videos
- Read news
- Download files

What is a Search Engine?

A **search engine** helps users find information on the Internet.

3DWEBSOFT FOUNDA

Examples

- Google
- Bing
- DuckDuckGo
- Yahoo

Example

Type:

"Solar System"

The search engine shows many useful websites, images, and videos about the Solar System.

Common Internet Services

Service	Purpose
📧 Email	Send and receive messages
🎥 Online Learning	Attend virtual classes
📺 Video Streaming	Watch educational videos
☁️ Cloud Storage	Store files online
💬 Video Calls	Communicate with others
📰 News Websites	Read current news
🛒 Online Shopping	Buy products online

Advantages of the Internet

- Quick access to information
- Online education
- Easy communication
- Entertainment
- Online shopping

3DWEBSOFT FOUNDATION

- Banking services
- Sharing files
- Learning new skills

Disadvantages of the Internet

- Fake information
- Online scams
- Cyberbullying
- Viruses and malware
- Screen addiction
- Privacy risks

Safe Internet Rules

FOUNDATION

ONLINE SAFETY GUIDELINES: STRONG PASSWORDS

ADD VARIETY

Use uppercase, lowercase, characters, and numbers.

DON'T RECYCLE

Don't use the same password for all of your accounts.

DON'T USE PERSONAL INFORMATION

Avoid using birthdates or names from your loved ones.

MAKE IT LONG

Use passwords longer than six characters when possible.

CHANGE OFTEN

Make sure to review your passwords and change them frequently.

USE A MANAGER

Password management apps and sites can help keep track.

Maimpis Integrated High School
500145@deped.gov.ph

- Never share passwords.
- Do not share personal information online.
- Visit trusted websites.
- Ask a parent or teacher before downloading files.
- Think before clicking links.
- Log out after using shared computers.
- Report anything suspicious to a trusted adult.

Internet Etiquette (Netiquette)

Good manners on the Internet are called **Netiquette**.

Follow these rules:

- Be polite and respectful.
- Do not send rude messages.
- Respect others' opinions.
- Use appropriate language.
- Do not spread false information.

3DWEBSOFT FOUNDATION

Practical Activities

Practical Activity 1 – Open a Web Browser

Objective

Learn how to open and use a browser.

Instructions

1. Turn on the computer.
2. Open a web browser.
3. Type an educational website address.

4. Read one interesting fact.
5. Close the browser.

Practical Activity 2 – Search for Information

Instructions

1. Open a search engine.
2. Search for **"Planets of the Solar System"**.
3. Read the results.
4. Write down three interesting facts.

Practical Activity 3 – Identify Internet Devices

Match the device with its purpose.

Device	Purpose
Router	Shares Internet connection
Computer	Accesses websites
Smartphone	Uses mobile Internet
Modem	Connects to the Internet service

Classroom Activity

True or False

1. The Internet connects computers around the world. ✅ **True**
2. A web browser is hardware. ❌ **False**
3. Wi-Fi is a way to connect to the Internet. ✅ **True**
4. You should share your password with everyone. ❌ **False**
5. A search engine helps you find information. ✅ **True**

3DWEBSOFT FOUNDATION

Quick Quiz

1. What is the Internet?

A. A game

B. A global network of connected computers ✅

C. A printer

D. A keyboard

2. Which device shares an Internet connection?

A. Router ✅

B. Printer

C. Monitor

D. Keyboard

3. Which software is used to open websites?

A. Web Browser ✅

B. Calculator

C. Paint

D. Notepad

4. Which tool helps you search for information online?

A. Search Engine ✅

B. Folder

C. Speaker

D. Mouse

5. Which is a safe Internet habit?

A. Share passwords

3DWEBSOFT FOUNDATION

B. Visit unknown websites

C. Keep personal information private ✅

D. Download everything

Home Assignment

1. Write the definition of the Internet.
2. List **five uses** of the Internet.
3. Name **three web browsers** and **three search engines**.
4. Draw a simple diagram showing a computer connected to the Internet through a router.
5. Write **five Internet safety rules**.

Lesson Summary

Today we learned:

- What the Internet is and how it works.
- Different Internet connections such as Wi-Fi, mobile data, broadband, and satellite.
- The difference between the Internet and the World Wide Web.
- Websites, web browsers, and search engines.
- Common Internet services.
- Advantages and disadvantages of the Internet.
- Safe Internet usage and good online behavior (Netiquette).
- Practical browsing and searching activities.

Learning Outcomes

By the end of this lesson, students will be able to:

- Define the Internet and explain its purpose.
- Describe how devices connect to the Internet.

3DWEBSOFT FOUNDATION

- Identify web browsers and search engines.
- Use a web browser to search for educational information.
- Explain the benefits and risks of using the Internet.
- Follow safe and responsible Internet practices while learning online.
