3D WEBSOFT INC. FOUNDATION

FUTURE TECH SCHOOL PROGRAM

Faculty Name :

Course Duration : 5 Months

Classes : Offline & Online

Daily Teaching : 2 Hours

Total Classes : 100

FOUNDATION

Level 2 – Young Technologist (7th–8th Standard)

Class 8: Google Search Skills

Learning Objectives

By the end of this lesson, students will be able to:

- Understand what a search engine is.
- Learn how to search for information effectively.
- Use simple search techniques to find accurate results.
- Recognize reliable and safe websites.
- Use search filters such as Images, Videos, and News.
- Practice responsible and ethical use of online information.

Introduction

Every day, millions of people search the Internet to find information for:

- 📚 Homework
- 🌍 General knowledge
- 🔬 Science projects
- 🎥 Educational videos
- 🖼️ Images
- 📰 News
- 💻 Programming tutorials

Learning how to search correctly helps us find **accurate and useful information quickly**.

2DWEBSOFT FOUNDATION

What is a Search Engine?

A **search engine** is a website or software that helps users find information on the Internet.

Simple Definition

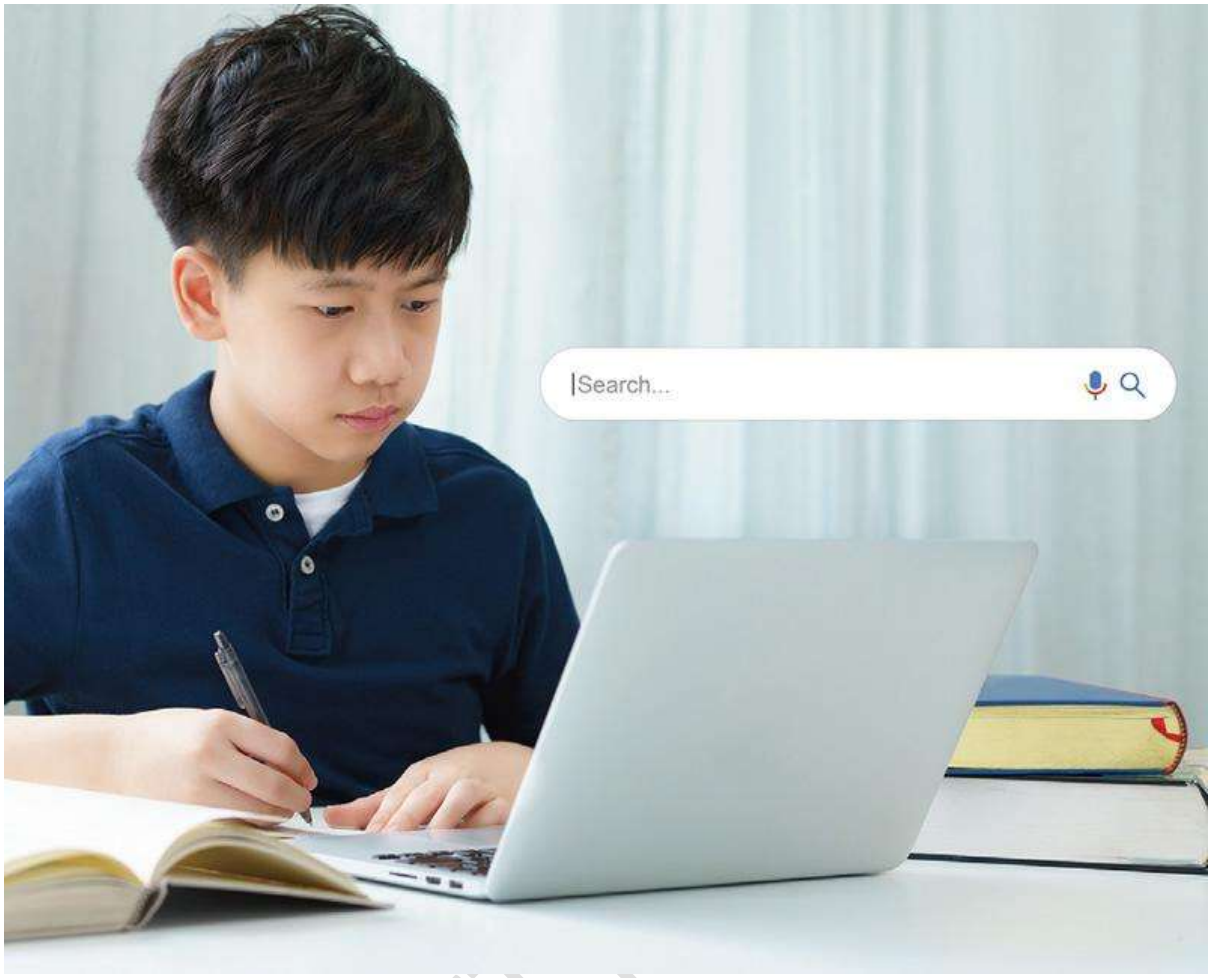

A search engine searches billions of web pages and shows the most relevant results based on the words you type.

Popular Search Engines

- Google
- Bing
- DuckDuckGo
- Yahoo

What is Google Search?

Google Search is one of the most widely used search engines. It helps users find:

- Websites
- Images
- Videos
- Maps
- News
- Books
- Educational resources

How Does Google Search Work?

When you type a question or keywords:

1. Google searches its index of web pages.
2. It finds pages related to your search.
3. It ranks the most useful results.
4. It displays them in a list for you to explore.

What are Keywords?

Keywords are the important words you type into the search box.

Example

❌ Poor Search:

Tell me everything about planets

✅ Better Search:

Planets in our solar system

Another Example:

❌

Animals

3DWEBSOFTFOUNDATION

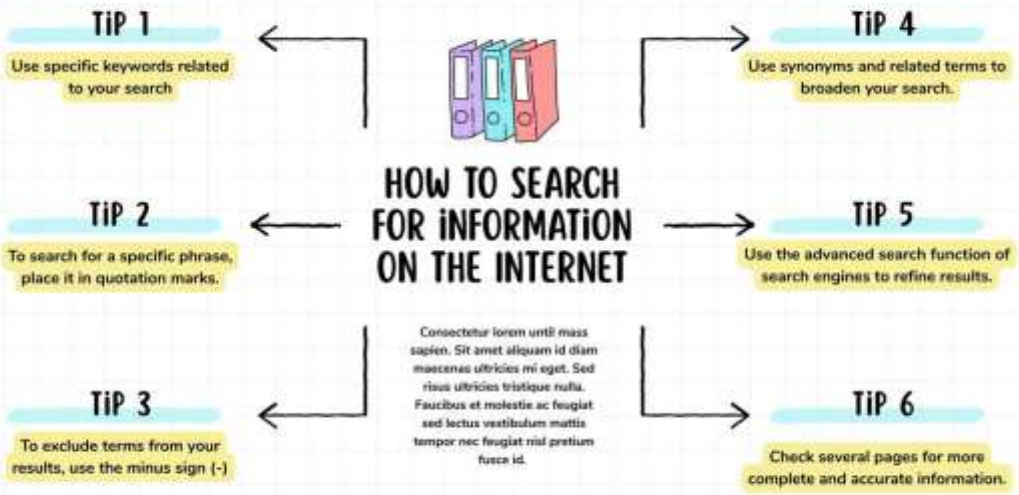

✅

Wild animals of India

Tips for Better Searching

1. Use Short and Clear Keywords

✔ "Water Cycle"

Instead of:

❌ "Can you explain everything about the water cycle?"

2. Be Specific

✔ "Python programming for beginners"

Instead of:

❌ "Python"

3. Check the Spelling

Correct spelling gives better results.

Example:

✔ "Volcano"

❌ "Volcono"

4. Use Multiple Keywords

Example:

- Solar System planets
- Famous Indian scientists
- Computer input devices

Types of Google Search Results

Google provides different categories of results.

Category	Purpose
🌐 All	General web pages
🖼️ Images	Pictures and diagrams
🎥 Videos	Educational videos

3DWEBSOFT FOUNDATION

Category	Purpose
📰 News	Latest news
📍 Maps	Locations and directions
📚 Books	Digital books and previews

Google Images

Search for pictures and diagrams.

Examples:

- Solar System
- Computer Parts
- Butterfly Life Cycle
- Human Heart

Google Videos

Search for:

- Educational videos
- Science experiments
- Coding lessons
- Mathematics tutorials

Google Maps

Find:

- Schools
- Hospitals

3DWEBSOFT FOUNDATION

- Museums
- Parks
- Tourist places

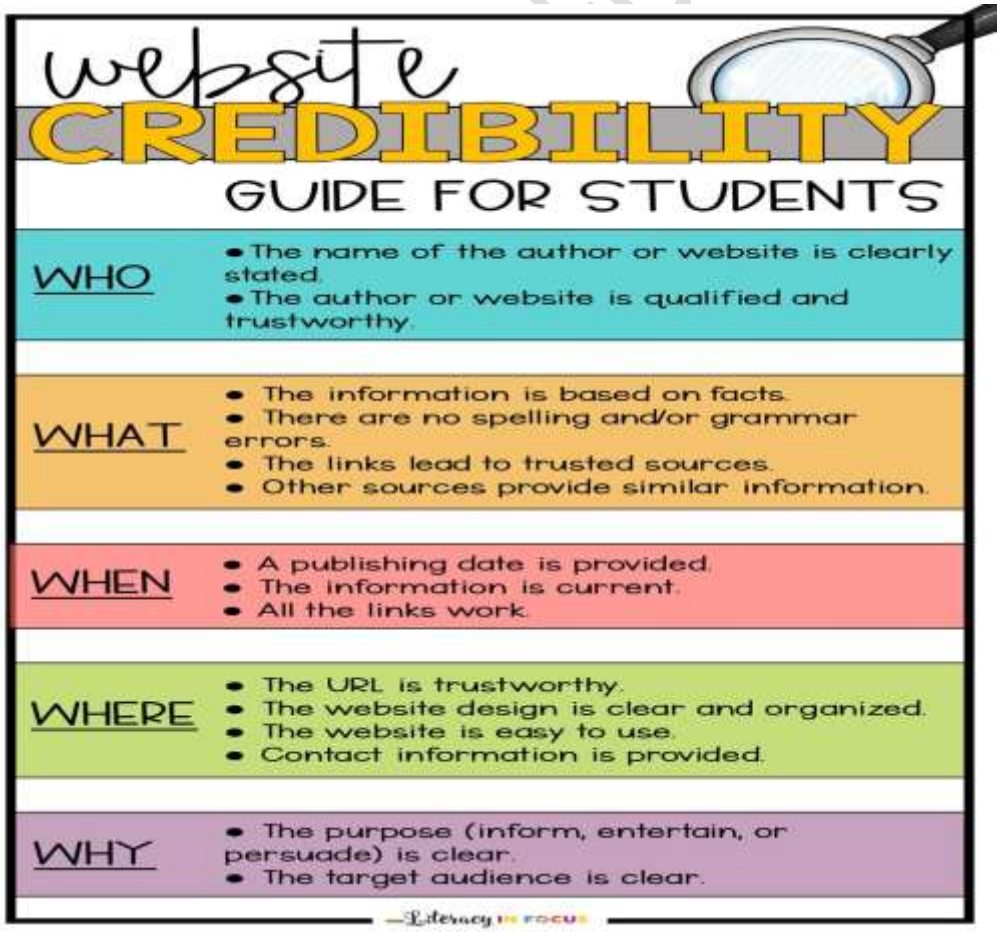

Google Books

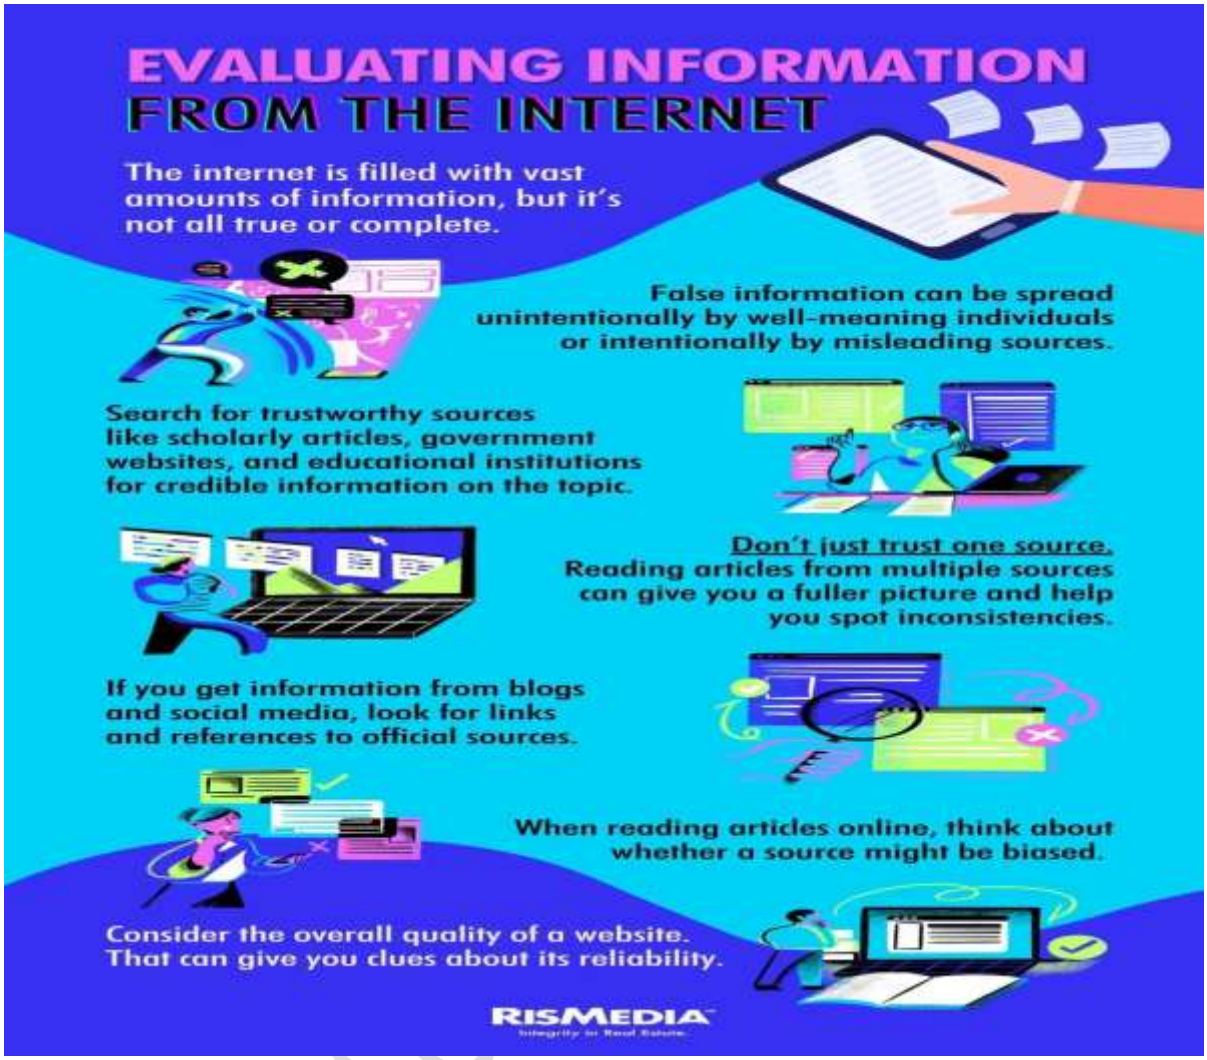

Read previews of books and educational materials.

Useful for:

- Storybooks
- Science books
- History books

Identifying Reliable Websites

Not every website contains correct information.

Choose websites that:

- Belong to schools or universities.
- Are created by educational organizations.
- Have updated information.
- Mention the author or source.

Avoid websites with:

- Too many pop-up advertisements.

- False or unbelievable claims.
- Unknown authors.
- Suspicious download links.

Safe Searching Tips

- Never share personal information.
- Do not click unknown links.
- Ask a teacher or parent before downloading files.
- Use Safe Search when available.
- Respect copyright and do not copy entire articles.

Copyright and Plagiarism

Copyright

The creator of a book, image, or video owns their work.

Plagiarism

Copying someone else's work and claiming it as your own is called **plagiarism**.

Always:

- Write answers in your own words.
- Mention the source if required.
- Use information responsibly.

Search Examples

3DWEBSOFT FOUNDATION

Search Topic	Good Search
Science	Water Cycle Diagram
Maths	Fractions for Class 7
Python	Python Variables Tutorial
History	Indian Freedom Fighters
Geography	Rivers of India Map
Computer	Input Output Devices

Useful Search Tips

- Use quotation marks (" ") to search for an exact phrase.
    - Example: "Solar System"
- Add the subject name.
    - Example: Python loops for beginners
- Add your class.
    - Example: Class 7 Science Chapter 3

3DWEBSOFT FOUNDATION

Practical Activities

Practical Activity 1 – Search for Information

Objective

Learn to search effectively.

Instructions

1. Open a web browser.

2. Use a search engine.
3. Search:

- Solar System
- Python Programming
- National Parks of India

4. Read the first educational result.

Practical Activity 2 – Search for Images

Instructions

Search for:

- Computer Parts
- Human Heart
- Butterfly
- Water Cycle

Observe the diagrams and identify key labels.

Practical Activity 3 – Compare Search Results

Search these two phrases:

- India
- Famous monuments in India

Discuss:

- Which search gives more useful results?
- Why is a specific search better?

Practical Activity 4 – Find a Reliable Website

3DWEBSOFT FOUNDATION

Choose one educational website and answer:

- What is the website name?
- What information did you learn?
- Why do you think it is reliable?

Classroom Activity

Match the Search Category

Search	Category
Solar System Images	Images
Python Tutorial Video	Videos
School Location	Maps
Latest Science News	News
Story Book	Books

Quick Quiz

1. What is a search engine?

A. A printer

B. A website that helps find information on the Internet ✅

C. A keyboard

D. A folder

2. Which is a good search query?

A. Tell me everything about computers

B. Computer hardware and software ✅

3DWEBSOFT FOUNDATION

C. I want information

D. Learn

3. Which Google category is best for diagrams?

A. News

B. Images ✅

C. Maps

D. Books

4. What should you check before trusting a website?

A. Reliable source ✅

B. Bright colors

C. Large advertisements

D. Funny pictures

5. What is plagiarism?

A. Creating your own work

B. Copying someone else's work and claiming it as your own ✅

C. Reading books

D. Drawing diagrams

3DWEBSOFT FOUNDATION

Home Assignment

1. Search for **"Seven Wonders of the World"** and write five facts.
2. Find one educational image of the **Solar System** and draw it in your notebook.

3. Search for **Python Programming** and write three things you learned.
4. List five examples of good search keywords.
5. Write five rules for safe Internet searching.

Lesson Summary

Today we learned:

- What a search engine is.
- How Google Search works.
- How to use keywords for better search results.
- Different types of Google search results such as Images, Videos, Maps, News, and Books.
- How to identify reliable websites.
- Safe searching practices and respect for copyright.
- Practical search activities and digital research skills.

Learning Outcomes

By the end of this lesson, students will be able to:

- Define a search engine and explain its purpose.
- Use effective keywords to search for information.
- Find educational images, videos, maps, and books.
- Identify trustworthy websites.
- Search safely and responsibly on the Internet.
- Apply digital research skills for school assignments and projects.
