3D WEBSOFT INC. FOUNDATION

FUTURE TECH SCHOOL PROGRAM

Faculty Name :

Course Duration : 5 Months

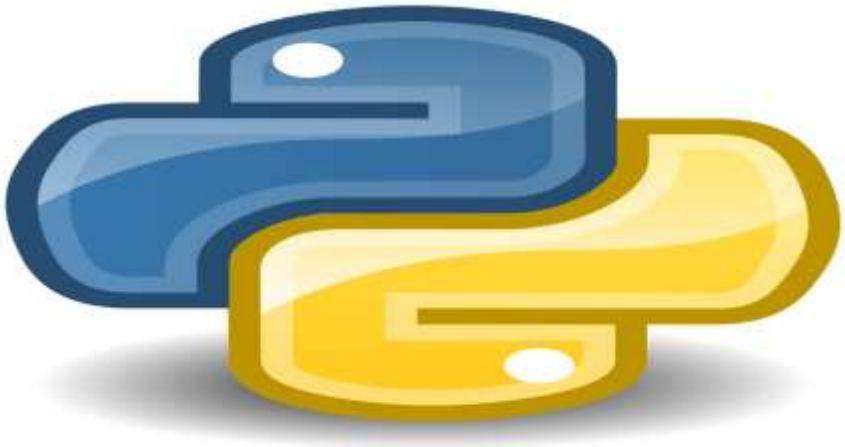

Classes : Offline & Online

Daily Teaching : 2 Hours

Total Classes : 100

Level 2 – Young Technologist (7th–8th Standard)

Lesson 12: Installing Python

3D WEBSOFT FOUNDATION

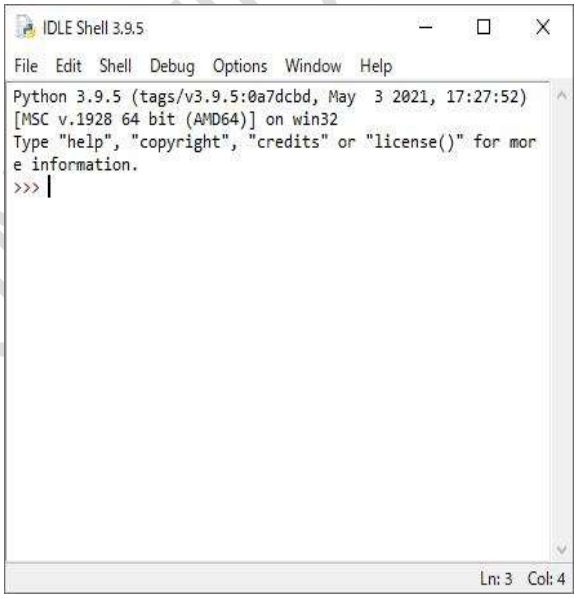

Learning Objectives

By the end of this lesson, students will be able to:

- Understand what Python is.

- Know why Python needs to be installed.
- Download Python safely.
- Install Python on Windows.
- Open Python after installation.
- Write and run their first Python program.

What is Python?

Python is a **programming language** that helps us communicate with computers.

Using Python we can create:

- 🎮 Games
- 🤖 Robots
- 🌐 Websites
- 📊 Charts
- 🧮 Calculators

- 🎨 Drawing programs
- Artificial Intelligence (AI)

Python is one of the easiest programming languages for beginners.

Why Do We Install Python?

Just like we install:

- WhatsApp
- Paint
- Microsoft Word
- Games

We must install Python before using it.

Without installing Python, the computer cannot understand Python programs.

What Do We Need?

Before installing Python:

✅ Computer (Windows)

✅ Internet connection

✅ Mouse

✅ Keyboard

Step 1: Download Python

Open your web browser.

Type:

3DWEBSOFT FOUNDATION

www.python.org

Click **Downloads**.

Click the yellow button:

Download Python

Step 2: Save the File

The computer downloads a file like:

python-3.x.x.exe

This is the installer.

Step 3: Open the Installer

Double-click the downloaded file.

The Python setup window appears.

Important Step

Before clicking Install,

✓ Tick the checkbox

Add Python to PATH

This is VERY IMPORTANT.

Without this option, Python may not work from Command Prompt.

Step 4: Install Now

Click

Install Now

3DWEBSOFT FOUNDATION

The installation starts.

Wait for a few minutes.

Step 5: Installation Complete

After installation you will see

Setup was successful

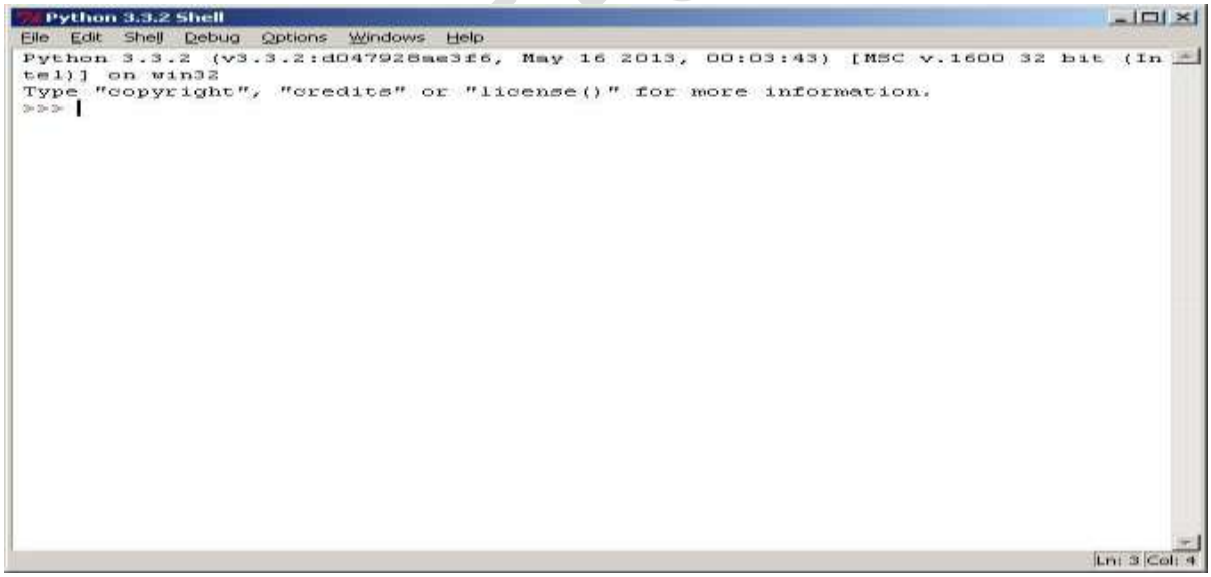

Click

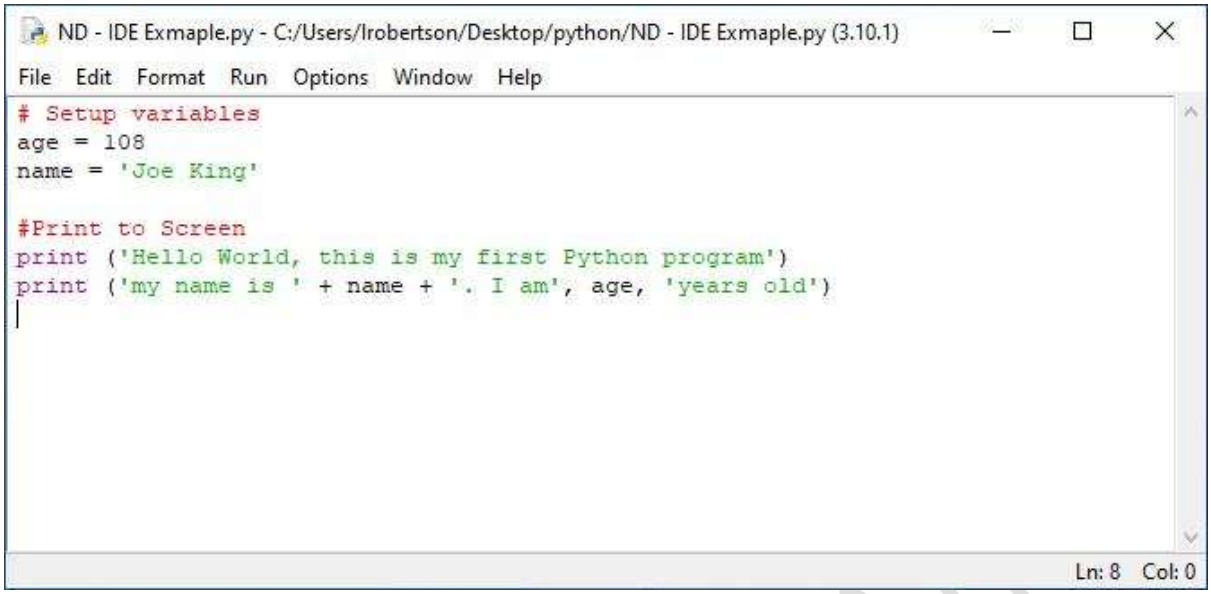

Close

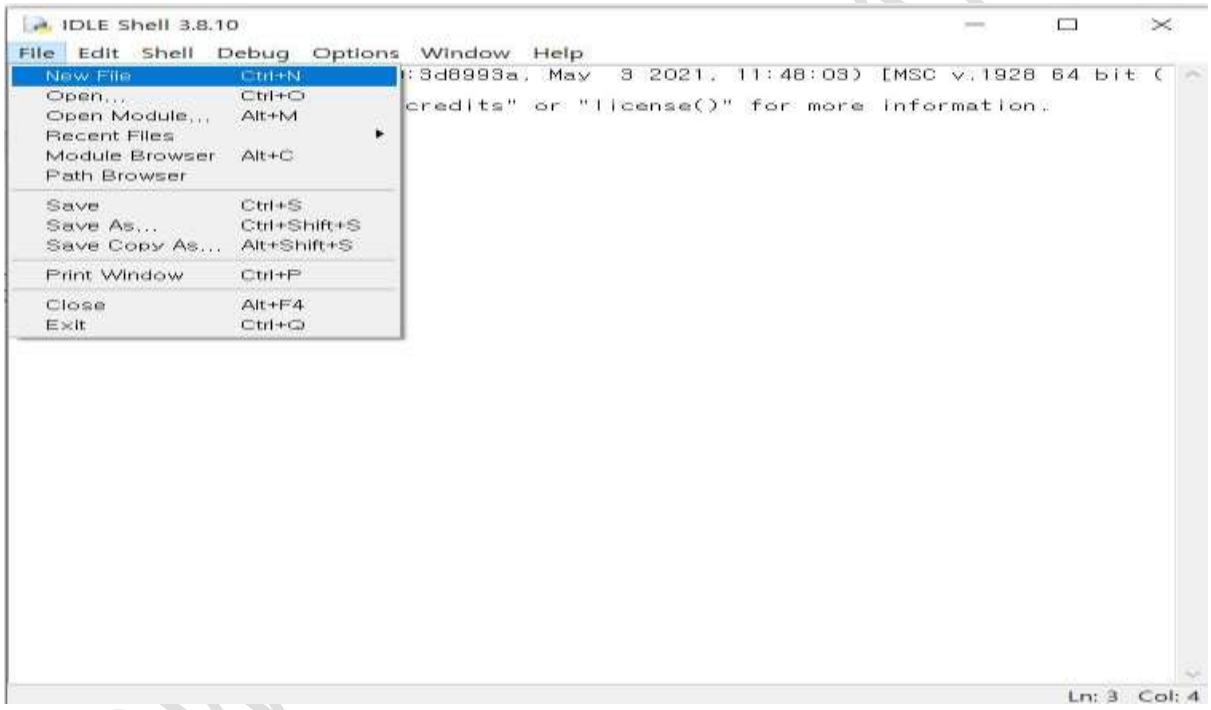

Congratulations!

Python is now installed.

What is IDLE?

Python comes with a software called

IDLE

IDLE means

Integrated Development and Learning Environment

It is where beginners write Python programs.

Opening Python IDLE

Click

Start Menu

↓

Type

IDLE

↓

Click

IDLE (Python)

You will see

Python 3.x.x

>>>

The symbol

>>>

means Python is ready.

Your First Python Program

Type

print("Hello")

Press

Enter

Output

Hello

3DWEBSOFT FOUNDATION

Another example

print("Welcome Students")

Output

Welcome Students

Printing Your Name

print("My name is Rahul")

Output

My name is Rahul

Students should replace Rahul with their own name.

Printing Age

print("I am 12 years old")

Printing School Name

print("ABC High School")

Multiple Print Statements

print("Hello")

print("Welcome")

print("Python is Fun")

Output

Hello

Welcome

3DWEBSOFT FOUNDATION

Python is Fun

Comments

Python ignores comments.

```
# This is my first program

print("Hello")
```

Activity 1

Write:

```
print("Good Morning")
```

Activity 2

Write:

```
print("I Love Coding")
```

Activity 3

Write your

- Name
- Class
- School

Example

```
print("Name : Ravi")
print("Class : 7")
```

3DWEBSOFT FOUNDATION

```
print("School : ABC School")
```

Fun Challenge

Can you print your favorite:

- Animal
- Fruit
- Sport

Example

```
print("Tiger")
print("Mango")
print("Cricket")
```

Important Terms

Word	Meaning
Python	Programming Language
Install	Put software on computer
IDLE	Python editor
Program	Set of instructions
Print	Display text
Output	Result shown on screen

Common Mistakes

❌ Forgetting to tick

3DWEBSOFT FOUNDATION

Add Python to PATH

❌ Missing quotation marks

Wrong

print(Hello)

Correct

print("Hello")

Practical Activities

Practical Activity

Students should:

- Download Python.
- Install Python.
- Open IDLE.
- Type:

print("Hello World")

- Press Enter.
- Observe the output.

Classroom Activity

Teacher asks students to:

- Install Python.
- Open IDLE.

3DWEBSOFT FOUNDATION

- Print their name.
- Print their school name.
- Print their favorite game.

Worksheet

Fill in the Blanks

1. Python is a _____ language.

Answer: **Programming**

2. We install Python using the _____ file.

Answer: **Installer**

3. The Python editor is called _____.

Answer: **IDLE**

4. The command used to display text is _____.

Answer: **print()**

5. Python programs show _____.

Answer: **Output**

3DWEBSOFT FOUNDATION

Quiz

1. Python is

A) Game

B) Programming Language ✅

C) Mobile

D) Browser

2. Which website is used to download Python?

A) Google

B) Python.org ✅

C) YouTube

D) Gmail

3. Which option should be checked during installation?

A) Delete Files

B) Add Python to PATH ✅

C) Restart PC

D) Skip Installation

4. Which software opens with Python?

A) Photoshop

B) IDLE ✅

C) Excel

D) VLC

5. Which command prints text?

A)

write()

B)

display()

3DWEBSOFT FOUNDATION

C)

print()

✅

D)

show()

Learning Outcome

After completing this lesson, students can:

- ✅ Explain what Python is.
- ✅ Download Python safely.
- ✅ Install Python correctly.
- ✅ Open Python IDLE.
- ✅ Write simple print() programs.
- ✅ Run their first Python program successfully.
